    SBI
UNIT I

1. What do you mean by financial service?
   Financial Services is a term used to refer to the services provided by the finance market. Financial Services is also the term used to describe organizations that deal with the management of money.

2. What are the characteristics of financial services?
   The basic characteristics of financial services are that they are intangible in nature. For financial services to be successfully created and marketed, the institutions providing them must have a good image and the confidence of its clients.

3. What are examples of financial services?
   Financial services are the economic services provided by the finance industry, which encompasses a broad range of businesses that manage money, including credit unions, banks, credit-card companies, insurance companies, accountancy companies, consumer-finance companies, stock brokerages, investment funds.

4. What are the nature and scope of finance?
   Nature, Significance, and Scope of Financial Management. Financial management is an organic function of any business. Any organization needs finances to obtain physical resources, carry out the production activities and other business operations, pay compensation to the suppliers, etc.

5. What are the Importance of Financial Services
   Importance of Financial Services. Presence of financial services enables a country to improve its economic condition. Economic growth is reflected on the people by the higher standard of living. Financial services enable individual to acquire various consumer products through hire purchase, factoring or other means.

6. What are financial products and services?
   Financial services are the economic services provided by the finance industry, which encompasses a broad range of businesses that manage money, including credit unions, banks, credit-card companies, insurance companies, accountancy companies, consumer-finance companies, stock brokerages, and investment funds, individual.

7. What is letter of credit with example?
   A letter of credit is a document issued by a third party that guarantees payment for goods or services when the seller provides acceptable documentation.

8. What is a Mutual Fund simple definition?
   A mutual fund is a kind of investment that uses money from investors to invest in stocks, bonds or other types of investment. A fund manager (or "portfolio manager")
decides how to invest the money, and for this he is paid a fee, which comes from the money in the fund.

9. What is mutual fund and its types?
A mutual fund is a basket of various investments, such as stocks, bonds, and cash. There are three main types of mutual funds: equity funds, fixed-income funds, and money market funds. Each of these types has a different risk level associated with it.

10. What are mutual funds with examples?
Mutual funds may include investments in stocks, bonds, options, futures, currencies, treasuries and money market securities. Depending on the stated objective of the fund, each will vary in regard to content and risk. Funds issue and redeem shares on demand at the fund's NAV, or net asset value.

11. What is Venture Capital?
Venture Capital is money invested in businesses that are small; or exist only as an initiative, but have huge potential to grow.

12. What is factoring and its functions?
Factoring is a financial service in which the business entity sells its bill receivables to a third party at a discount in order to raise funds. It differs from invoice discounting. Factoring involves the selling of all the accounts receivable to an outside agency.

13. What is Indian Companies Act?
Indian Companies Act 1956.

14. What is Reserve Mortgage?
A reverse mortgage is an arrangement whereby a homeowner borrows against his or her home equity and receives regular payments from the lender until the total payments reach a predetermined limit.

15. What do you mean by factoring?
Factoring is a financial transaction and a type of debtor finance in which a business sells its accounts receivable (i.e., invoices) to a third party (called a factor) at a discount. A business will sometimes factor its receivable assets to meet its present and immediate cash needs.

16. What do you mean by Forfaiting?
Forfaiting is a means of financing that enables exporters to receive immediate cash by selling their medium and long-term receivables – the amount an importer owes
the exporter – at a discount through an intermediary. A forfeiter is typically a bank or a financial firm that specializes in export financing.

17. What do you mean by custodial service

A custodial service is when an entity or individual holds a client's property or money on their behalf. The custodian is responsible for the safety of the financial products.

18. What do you mean by securitization?

Securitization is the procedure whereby an issuer designs a financial instrument by merging various financial assets and then markets tiers of the repackaged instruments to investors. This process can encompass any type of financial asset and promotes liquidity in the marketplace.

19. What is securitization with example?

Securitization is the process of turning assets into securities. An asset that takes longer to convert to cash and will likely sell for a price lower than market value is called an illiquid asset. For example, a money market account is an account at a bank used to store cash.

20. What do you mean by merchant banking?

A merchant bank is a company that deals mostly in international finance, business loans for companies and underwriting. A merchant bank may perform some of the same services as an investment bank, but it does not provide regular banking services to the general public.

UNIT II

21. What is new issue market?

A new issue is a reference to a security that has been registered, issued, and is being sold on a market to the public for the first time. The term does not necessarily refer to newly issued stocks, although initial public offerings (IPOs) are the most commonly known new issues.

22. What is primary or new issue market?

The primary market is a financial market where new securities. A company offers securities to the general public to raise funds and fulfill its long-term goals. It can also be called the New Issue Market (NIM). In these markets, securities are directly issued by the companies to the investors.

23. What is primary market example?

The primary market is where securities are created. It's in this market that firms sell (float) new stocks and bonds to the public for the first time. An initial public offering, or IPO, is an example of a primary market. Investors can then buy the IPO at this price directly from the issuing company.
24. What are primary and secondary markets?
In the primary capital market, investors buy directly from the issuing company. In the secondary market, investors trade securities among themselves. When a company goes public, it sells new stocks and bonds for the first time. Usually, that sale takes the form of an initial public offering.

25. What is new issue market function?
The stock exchanges, thus, exercise considerable control over the organization of new issues. As stated earlier, the main function of new issue market is to facilitate transfer of resources from savers to the users. The savers are individuals, commercial banks, insurance company etc.

26. What is an example of a secondary market?
The secondary market, also called the aftermarket and follow on public offering is the financial market in which previously issued financial instruments such as stock, bonds, options, and futures are bought and sold. After the initial issuance, investors can purchase from other investors in the secondary market.

27. What is the other name of primary market?
The Primary Market, also known as a New Issue Market, is where new securities are issued – it is part of the capital market. Corporations, national and local governments, and other public sector institutions can get financing through the sale of new stock or bond issues through the primary market.

28. What are the differences between primary and secondary markets?
The difference between the primary capital market and the secondary capital market is that in the primary market, investors buy securities directly from the company issuing them, while in the secondary market, investors trade securities among themselves, and the company with the security being traded does usually not.

29. What are the functions of secondary market?
The stock market helps to value the securities on the basis of demand and supply factors. The securities of profitable and growth oriented companies are valued higher as there is more demand for such securities. The valuation of securities is useful for investors, government and creditors.

30. What is Underwriting?
Underwriting is the process that a lender or other financial service uses to assess the creditworthiness or risk of a potential customer.

Underwriting also refers to an investment banker's process of packaging and selling a security on behalf of a client.
31. What are the functions of primary market?

The primary market plays the crucial function of facilitating the capital formation within the economy. The securities issued at the primary market can be issued in face value, premium value, and at par value.

32. What are the types of underwriting?

In the firm commitment contract the underwriter guarantees the sale of the issued stock at the agreed-upon price.

In the best efforts contract the underwriter agrees to sell as many shares as possible at the agreed-upon price.

33. Definition of 'Offer for Sale.'

Offer for sale (OFS) is a simpler method of share sale through the exchange platform for listed companies. Only promoters or shareholders holding more than 10 per cent of the share capital in a company can come up with such an issue.

34. What is public issue in primary market?

Primary market is a market wherein corporate issue new securities for raising funds generally for long term capital requirement. The companies that issue their shares are called issuers and the process of issuing shares to public is known as public issue.

35. What is Right issue?

A rights issue is a way by which a listed company can raise additional capital. However, instead of going to the public, the company gives its existing shareholders the right to subscribe to newly issued shares in proportion to their existing holdings.

36. What is Secured premium notes?

Secured premium notes (SPNs) are financial instruments which are issued with detachable warrants and are redeemable after certain period. SPN is a kind of non-convertible debenture (NCD) attached with warrant. It can be issued by the companies with the lock-in-period of say four to seven years.

37. What is IDRS?

The Integrated Data Retrieval System (IDRS) is a system which enables employees in the Campuses and the Area Offices to have instantaneous visual access to certain taxpayer accounts.

38. What is Shares?

Shares are units of ownership interest in a corporation or financial asset that provide for an equal distribution in any profits, if any are declared, in the form of dividends. The two main types of shares are common shares and preferred shares.

39. What Are Bonds With Warrants?

Bonds are a standard method for corporations and governments to raise money. When an organization issues a bond, it guarantees a preset payment to buyers at a later date and highly rated bonds from financially sound companies are considered an extremely safe investment. Bonds with warrants offer something more, a chance to buy shares in the company at a guaranteed price.
40. What is bond option?

In finance, a bond option is an option to buy or sell a bond at a certain price on or before the option expiry date. These instruments are typically traded OTC. A European bond option is an option to buy or sell a bond at a certain date in future for a predetermined price.

UNIT III

41. What is SEBI explain its function?

The Regulatory functions of SEBI. The main regulatory functions of SEBI revolve around the effective management of the stock market. The various regulatory functions that this organization is entrusted with are Brokers; merchant bankers are intermediaries that operate in the stock market.

42. What is Controller of Capital Issues?

Controller of Capital Issues was the regulatory authority before SEBI came into existence; it derived authority from the Capital Issues (Control) Act, 1947. In April 1988 the SEBI was constituted as the regulator of capital markets in India under a resolution of the Government of India.

43. What are the powers and function of SEBI?

Functions & Powers of SEBI. The function of SEBI is to protect the interests of investors in securities and to promote the development of securities market and to regulate it. The three groups which constitute the market and to whom SEBI is responsive to are: Issuer of Securities

44. What are the objective of SEBI?

The primary objective of SEBI is to protect the interest of people in the stock market and provide a healthy environment for them. This was the reason why SEBI was formed. Among the main objectives, preventing malpractices is one of them.

45. What is a bonus share issue?

A bonus issue, also known as a scrip issue or a capitalization issue, is an offer of free additional shares to existing shareholders. A company may decide to distribute further shares as an alternative to increasing the dividend pay-out. For example, a company may give one bonus share for every five shares held.

46. What is a debenture?

A debenture is a medium to long-term debt format that is used by large companies to borrow money.

47. What is an example of a debenture?

The definition of a debenture is a long-term bond issued by a company, or an unsecured loan that a company issues without a pledge of assets. An interest-bearing bond issued by a power company is an example of a debenture.

48. Who is a Debenture holder?
Debenture holders (investors) are not allowed to vote in the company's general shareholders meetings, but they may have separate meetings or votes, for instance regarding changes to the rights associated with the debentures.

49. What is the difference between shares and debentures?
Share is the capital of the company, but Debenture is the debt of the company. The shares represent ownership of the shareholders in the company. On the other hand, debentures represent indebtedness of the company. The income earned on shares is the dividend, but the income earned on debentures is interest.

50. What are the features of debentures?
The most salient features of Debentures are as follows:

- A debenture acknowledges a debt.
- It is in the form of certificate issued under the seal of the company (called Debenture Deed).
- It has a rate of interest & date of interest payment.
- Debentures can be secured against the assets of the company or may be unsecured.

51. What is credit rating?
A credit rating is an evaluation of the credit risk of a prospective debtor (an individual, a business, company or a government), predicting their ability to pay back the debt, and an implicit forecast of the likelihood of the debtor defaulting.

52. Write any two objectives of credit rating.
Credit rating provides a guide to the investors as to the risk of timely payment of interest and principal on a particular debt instrument. Its rating creates awareness of the concept of credit rating amongst corporations, merchant bankers, brokers, regulatory authorities, and helps in creating environment that facilitates the debt rating.

53. Write any two functions of credit rating.
Basis for proper risk return trade off
Healthy discipline on corporate borrowings

54. Write any two benefits of credit rating.
Provides superior information
Low cost information

55. Mention the credit rating agencies in India.
