1.1.1 Programme outcomes (POs) and Courses Outcomes(COs) of the Programmes offered by the institution (2023-2024)

Programme Outcomes refer to the knowledge, skills, and abilities that a student is expected to have acquired upon completing a specific academic programme such as a degree or diploma. These outcomes define the overall expectations for graduates at the program level. Course Outcomes refer to the specific knowledge, skills, and attitudes that a student is expected to have achieved by the end of a particular course. These outcomes are much more detailed and course-specific compared to Program Outcomes and describe what students should be able to do upon completion of a course.

In accordance with Outcome Based Education (OBE), our college has incorporated the Programme Outcomes (POs) and Course Outcomes (COs) into all courses provided across different programs. Following is the description of the COs of the courses given by the various departments.
