

Action Taken Report – Based on Feedback on Curriculum (2023)

S.No	Stake holder	Suggestions Given by Stakeholders	Action taken
1	Faculty	As a means of enhancing employability and pursuing higher education, the current curriculum will be revamped so that experimental learning is instilled and in-depth knowledge is enhanced.	Reagents in organic synthesis, Quantum mechanics, Bioinorganic chemistry, Electrochemical instrumentation, Corrosion and its prevention are instigated in our curriculum.
2	Employer	The majority of employers believe that the curriculum is relevant to industrial needs. They also have positive opinions about the curriculum's ability to ensure student attitudes and professional ethics.	The syllabus has also been enhanced by incorporating new methods and advanced techniques.
3	Student	The majority of students believe that the course content is relevant to their future careers. The curriculum had the potential to develop entrepreneurial skills in students. The current curriculum is career-oriented. A few students suggested that interdisciplinary courses be included to meet the most recent industrial requirements.	The curriculum has a tendency to focus on skill development in order to meet industry requirements. Innovative new courses are introduced, and course syllabuses are updated as per the industry requirements.
4	Alumni	The curriculum should be revised to reflect the latest developments and applications.	Courses that cater to the needs of the future are introduced.
