Title of the Event: Need for Energy Conservation and Frugality in Energy Use

Event Date: 15.12.2023

Event ID: IQAC/2023-24/Dec/166

The UG Department of Commerce (CA) organised an awareness programme on Need for Energy Conservation and Frugality in Energy Use on 15.12.2023. Mr. C. Jebaraj, BEE Certified Energy Auditor, ALCHEME Green Energy Company, Madurai acted as resource person and has enlightened the importance of energy conservation and the economy in energy use. The resource person also highlighted that India's culture abounds with environment-friendly and low-resource use practices. Traditionally Indians follow frugal lifestyles which are in harmony with nature and the local conditions. These practices need to be encouraged for minimizing the adverse impact on the environment. The good green deeds are simple, practical steps that every person may perform in day-to-day life that can make a visible difference to the environment. We can practise the actions listed at the individual level, community level, and corporate level, for the overall protection of the environment. It attempts to make people at ground level, aware of the environmental issues in a simplified manner.

About 40 students of B.Com(CA) has participated in the event and got benefited out of it.

CPR

Cardiopulmonary resuscitation is a technique that is used to press the heart muscles to keep the sick person alive before reaching the hospital.

CPR – or Cardiopulmonary Resuscitation – is an emergency lifesaving procedure performed when the heart stops beating. Immediate CPR can double or triple chances of survival after cardiac arrest. The American Heart Association invites you to share our vision: a world where no one dies from cardiac arrest.

Steps of CPR:

Put the person on their back on a firm surface.

Kneel next to the person's neck and shoulders.

Place the lower palm of your hand over the center of the person's chest, between the nipples.

Place your other hand on top of the first hand. Keep your elbows straight. Place your shoulders directly above your hands.

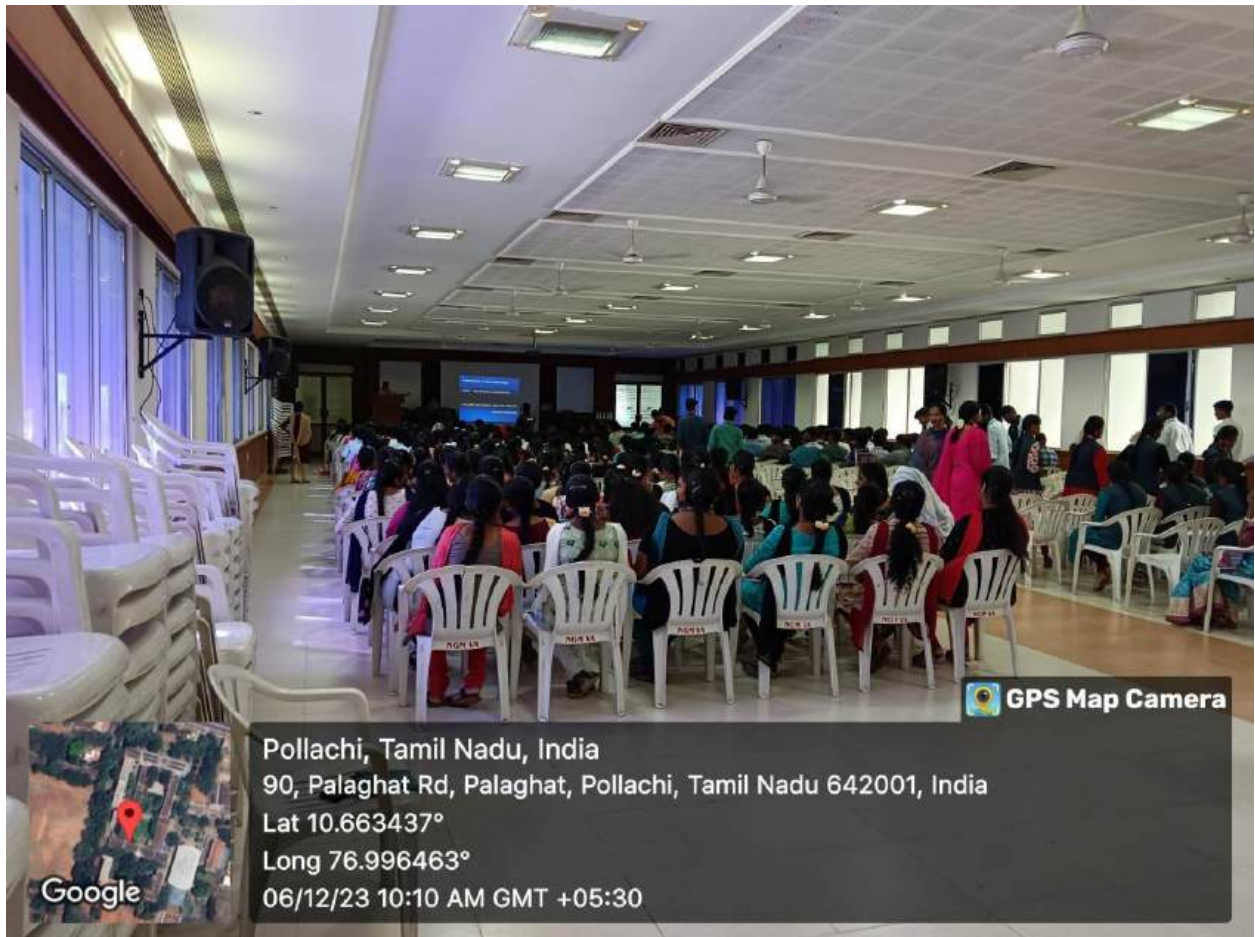

Push straight down on the chest at least 2 inches (5 centimeters) but no more than 2.4 inches (6 centimeters). Use your entire body weight, not just your arms, when doing compressions.

Push hard at a rate of 100 to 120 compressions a minute. The American Heart Association suggests performing compressions to the beat of the song allow the chest to spring back after each push.

If you have been trained in CPR, continue chest compressions until there are signs of movement or until emergency medical personnel take over. If you have been trained in CPR, go on to opening the airway and rescue breathing.

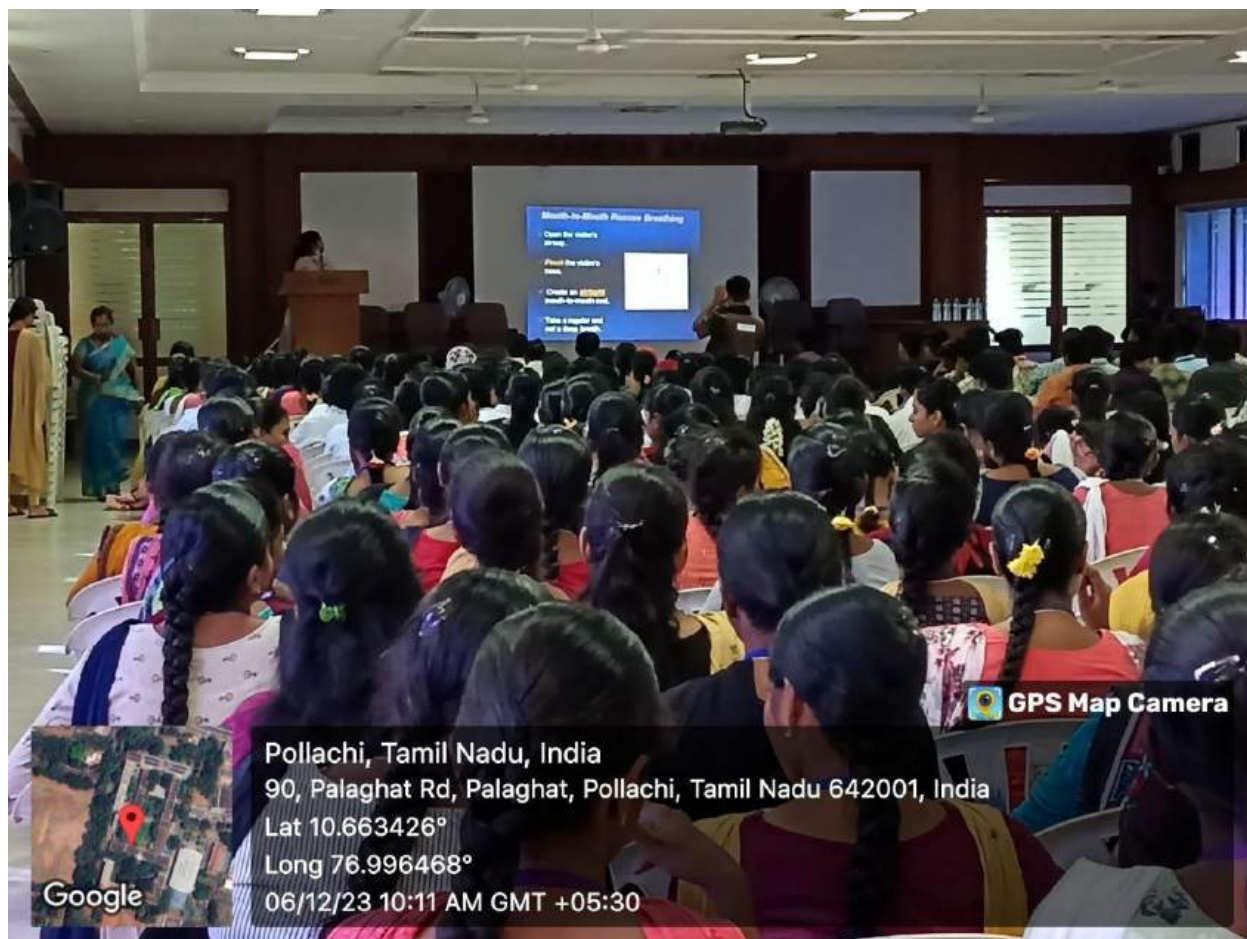

Conclusion:

Cardiopulmonary resuscitation (CPR) is a lifesaving technique that's useful in many emergencies in which someone breathing or heartbeat has stopped. For example, when someone has a heart attack or nearly drowns. The American Heart Association recommends starting CPR with hard and fast chest compressions. This hands-only CPR recommendation applies to both untrained bystanders and first responders.

CONNECTING HEARTS AND COLORS

In her role as the Foundation Chairperson, Rtr. M. Elakya skillfully carried out a personal project on November 30, 2023. This involved organizing drawing competitions, storytelling sessions, and engaging with children throughout the day, all centered around the theme of "Connecting Hearts and Colors" at a government school in Pollachi. Witnessing the children's enthusiasm, creativity, and artistic skills brought her great joy. To encourage their participation, she distributed chocolates to the students. The time spent with these kids on that day continues to be a cherished and memorable experience for her.

GO GREEN KIDS

I, Rtr.M.Subharanjana, Community Service Director, orchestrated a program on November 28, 2023, wherein we planted 10 saplings at a primary education school. Teachers joined in to support the students. Various tree saplings, including Teak and Balm, were planted across the school premises. Initially, we began by implanting seedlings along the center of the garden and then extended the plantation along all sides of the main ground. Additionally, a chart was designed to raise awareness among people about the importance of tree plantations.

RED RIBBON CLUB (RRC)

Red Ribbon club of NGM College organized an Extension Activity to school students and Staff members on the title of "Awareness Programme on World Mental Health and Polio day" to Government Higher Secondary School, Senjerimalai.

A mental illness is a physical illness of brain that causes disturbances in thinking, behavior, energy or emotion that makes it difficult to cope with the ordinary demands of life. Research is starting to uncover the complicated causes of these diseases which can include genetics, brain chemistry, brain structure, experiencing trauma and/or having another medical condition, like heart disease.

World Polio Day was established to eradicate polio worldwide and to ensure a polio-free future for everyone, develop high immunization coverage, implement high-quality observation to detect any presence of the virus and plan for an outbreak response. Every year on 24 October, we observe World Polio Day to raise awareness of the importance of polio vaccination to protect every child from this devastating disease, and to celebrate the many parents, professionals and volunteers whose contributions make polio eradication achievable. Our NGM RRC Students gave Valuable insights to school students about both mental health and Polio.

Around School Students were Actively Participated along with Staff Members. The Event was organized by Dr. R. Jayaprakash & Ms. Gayathiri, Assistant Professors, Co-ordinator of RRC, NGMC.

During the session, with the use of an LCD, the doctors have provided a clear explanation of the causes of breast and cervical cancer, the early warning signs of the disease and, if verified, how to treat it, as well as the resources the government hospital has to treat cancer. Earlier, our EOC coordinator, Dr. P. Bruntha welcomed the gathering and our Principal, Dr.R.Muthukumaran, delivered the presidential address. At last our NSS Coordinator, Dr.R.Somasundaram, proposed the vote of thanks to all the doctors, coordinators of the event and student participants. Introduction:

Indian Swachhata Dengue Season -2, themed "The Coconut City, My Cleanliness My Responsibility," aimed at addressing the twin challenges of sanitation and dengue prevention in our communities. This initiative underscores the importance of individual responsibility in maintaining cleanliness and preventing the spread of dengue, particularly in urban areas often referred to as "The Coconut City."

Overview:

The Coconut City, a metaphor for urban centers in India, faces significant challenges regarding sanitation and vector-borne diseases like dengue. The second season of the Indian Swachhata Dengue initiative focuses on raising awareness, promoting proactive measures, and fostering a sense of community responsibility to combat these challenges effectively.

Key Objectives:

- **Promoting Awareness:** Educating residents about the importance of cleanliness and its direct link to preventing diseases like dengue.
- **Encouraging Participation:** Engaging citizens in community-driven cleanliness activities and dengue prevention efforts.
- **Implementing Sustainable Solutions:** Introducing long-term strategies for maintaining cleanliness and controlling dengue transmission.
- **Fostering Collaboration:** Facilitating partnerships between local authorities, community organizations, and residents to ensure a concerted effort in achieving the campaign's goals.
- **Awareness Campaigns:** Conducting workshops, seminars, and door-to-door campaigns to educate residents about sanitation practices and dengue prevention measures.
- **Cleanliness Drives:** Organizing regular clean-up drives in residential areas, parks, and public spaces to promote cleanliness and discourage mosquito breeding sites.
- **Vector Control Measures:** Implementing mosquito control measures such as fogging, larviciding, and distributing mosquito nets to vulnerable communities.
- **Community Engagement Programs:** Involving residents in planning and implementing initiatives tailored to their specific needs and challenges.
- **Advocacy and Policy Support:** Advocating for stronger enforcement of sanitation regulations and policies at the local and municipal levels.
- **Improved Sanitation:** Increased awareness and community participation lead to cleaner neighborhoods and reduced instances of indiscriminate waste disposal.

Activities and Initiatives:

- **Dengue Prevention:** Implementation of vector control measures contributes to a decline in dengue cases and mosquito breeding habitats.
- **Empowered Communities:** Residents develop a sense of ownership and responsibility for their environment, leading to sustained efforts in maintaining cleanliness and preventing diseases.
- **Enhanced Collaboration:** Strengthened partnerships between stakeholders result in more coordinated and effective responses to sanitation and public health challenges.

Conclusion: "The Coconut City, My Cleanliness My Responsibility" campaign under the Indian Swachhata Dengue Season -2 highlights the critical role of individual and community action in achieving sustainable sanitation and dengue prevention. By fostering awareness, participation, and collaboration, this initiative strives to create cleaner, healthier, and more resilient urban communities across India.
