Journal of Analysis and Computation (JAC), is a scholarly peer-reviewed open access academic journal. The journal covers the frontier issues in the Engineering, Science, Technology and their applications in business, industry and other subjects. The subjects covered by the journal include artificial intelligence, bioinformatics, computational statistics, database, data mining, financial engineering, hardware systems, imaging engineering, internet computing, networking, scientific computing, software engineering, etc. and their applications.

The journal is accessible to accredited universities and government libraries. All the papers in the journal are also available freely with online full-text content and permanent worldwide web link. The abstracts will be indexed and available at major academic databases.

Journal of Analysis and Computation (JAC), welcomes author submission of papers concerning any branch of the Engineering, Science, Technology and their applications in business, industry and other subjects.

All submitted papers are to be peer-reviewed for ensuring their qualities.
