INSTITUTION PRACTICES FOR NEP IMPLEMENTATION

NEP implementation in the future, focusing on teacher training and course offerings:

Equipping Educators: Workshops and Seminars

The NEP recognizes the importance of well-equipped teachers for successful implementation. To achieve this, the policy envisions providing teachers with orientation programs in the form of workshops and seminars. These programs will focus on:

NEP Pedagogy: Teachers will be trained in the new pedagogical approaches emphasized by NEP, such as flipped classrooms, experiential learning, and activity-based teaching.

Interdisciplinary Course Design: Developing and delivering interdisciplinary courses requires specific skills. These workshops will equip teachers with the knowledge and tools to design and teach courses that effectively integrate knowledge from various disciplines.**Interdisciplinary Courses: Value Added Courses**

The NEP views interdisciplinary courses as value-added courses within a programme. These courses will go beyond traditional disciplinary boundaries, fostering a more holistic learning experience for students.

The National Education Policy (NEP) in India is aiming to revolutionize higher education by introducing interdisciplinary courses across various programs and significantly increasing the number of unique course offerings. This two-pronged approach addresses both the needs of the local community and prepares students for the globalized future.

The context of NEP implementation is to describe an approach that has two main parts working together. So, NEP is using two strategies to achieve its goals:

- Introducing interdisciplinary courses across all programs in the bi-semester
- Increasing the number of unique courses offered overall as Value Added Courses.

Catering to Local and Global Needs

The NEP aims to offer courses that address both local and global contexts. This ensures graduates are prepared for the demands of their communities and the wider world.

Local Needs: The College can design courses that cater to the specific needs of the local job market and community.

Global Needs: In an interconnected world, NEP recognizes the need for graduates who can address global challenges. Courses will be introduced that address issues like climate change, public health, and international relations will prepare students to thrive in the global arena.

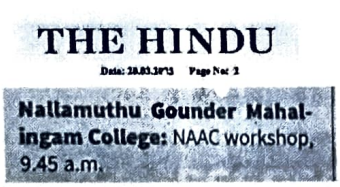

The focus on teacher training and the introduction of interdisciplinary courses that meet local and global needs are key components of the NEP's vision for higher education. By providing a well-rounded and relevant education, NEP aspires to equip students with the knowledge, skills, and flexibility to succeed in the 21st century.

Technical Session – I

Technical Session I was handled by **Dr.Latha Nair, Professor and Research Guide, Department of English, Amirta Vishwa Vidyapeetham, Kochi Campus** on **"Implementation of Outcome Based Education: Opportunities and Challenges"** through on line mode. She has highlighted the challenges and opportunities in outcome based education. Her session commenced with the ancient system of teaching-learning and how to enable the students to locate their purpose of their life. She has also explained the importance of outcome based thinking and figure out the challenges in implementing the OBE. She also spoke about the art of balancing between innovation and research. She also emphasised on achieving excellence in teaching and learning along with research and engagement.

She stated the importance of Specific benchmarking i.e clear-cut breakup of all pedagogical and assessment procedures. The Benchmarking should be clear to the teachers and students, which would help the teachers to know about the scope of the subject, map out or fix the cognitive performance of the students. The teacher's role is to identify the needs of the community and the country as a whole before drafting the curriculum. It must be integrated into the curriculum, in order to mitigate the disparity of standards. The greatest challenge for the teacher is to document and validate the learner's potential.

'Divya Drishti' means the intuitive perception achieved by yogis, that enables them to see the past and future which would be applicable in the academics to connect the learning outcomes to the needs of society. She also mentioned that students should have the opportunity to track their "Ikigai" – a Japanese word (reason for living) so that they could be aware of their obligations, to make important decisions in their life. Research outputs are a good example of implementing OBE.

She concluded by stating that Subject based benchmarking plays a pivotal role. It improves the quality of the classroom process which curtails the wide spread disparity of academic standards across institutions.

Technical Session – III

Technical Session III was handled by **Dr.N.Muthumani, Principal,** PPG College of Arts and Science, Coimbatore on **"Curriculum Framing and Development "**. Her speech centered on the important aspects of Curriculum, Outcome Based Education, Principles of OBE ,including clarity of focus, designing back, high expectation and expanded opportunity.

Value Added Course

23UCS4VA – PYTHON FOR DATA ANALYTICS

Course Objective

To introduce the concepts of python programming constructs

Course Outcomes (CO)

At the end of this course, students should be able to:

1. Apply the concept of Decision making statements, looping constructs , functions for solving basic programs
2. Analyze the concepts of Lists, tuples and error handling mechanisms
3. Evaluate a program incorporating all the python language constructs

Syllabus

Unit I **(5 Hours)**

Introduction to Python and Data Analytics: Overview of Python as a programming language - Introduction to Data Analytics and its significance - Setting up Python environment (Anaconda, Jupyter Notebook)

Unit II **(3 Hours)**

Python Basics for Data Analytics: Variables, Data Types, and Basic Operations – Lists, Tuples, and Dictionaries - Control Structures (if, else, loops)

Unit III **(2 Hours)**

Data Manipulation with Pandas : Introduction to Pandas library for data manipulation - Loading and exploring data – Data indexing, slicing, and filtering

List of Exercises **(20 Hours)**

SET A

- Write a python program that displays the following information: Yourname, Full address Mobile number, College name, Course subjects.
- Write a python program to find the largest three integers using if-else and conditional operator
- Write a python program that asks the user to enter a series of positive numbers (The user should enter a negative number to signal the end of the series) and the program should display the numbers in order and their sum.

SET B

- Write a python program to find the product of two matrices [A]mxp and[B]pxr
- Write recursive functions for GCD of two integers.
- Write recursive functions for the factorial of positive integer.
- Write recursive functions for Fibonacci Sequence up to given number n.
- Write recursive functions to display prime number from 2 to n.
- Write a python program that writes a series of random numbers to a file from 1 to n and display.
- Write a python program to sort a given sequence: String, List and Tuple.

Value Added Course

23UCS2VA – CLOUD BASED OFFICE AUTOMATION

Course Objective

Provide students with a foundational understanding of cloud computing concepts, including cloud services, deployment models, and their significance in office automation.

Course Outcomes (CO)

At the end of this course, students should be able to:

1. Understand how to create a Google Workspace account
2. Get familiar with Google Workspace and its applications
3. Learn in-demand skills of Google Workspace
4. Knowledge about how to properly assign, manage and evaluate students through Google Hangouts

Syllabus

Unit I **(5 Hours)**

Google Drive: Managing files - Creating and managing folders - Uploading folders from hard drive - Locating files - Changing display and settings - Sharing files and folders - Sharing notifications, Publish to web. **Google Hangouts Meet:** Scheduling a Hangout - Launching a Hangout - Presenting your screen in a Hangout - Managing sound, video and bandwidth - Managing meetings with Hangouts

Unit II **(3 Hours)**

Working in Docs: Setting up pages - Inserting non-text elements - Changing text attributes - Formatting text blocks - Using content management tools - Inserting and editing tables - Collaborating and sharing in Docs – Download. **Working in Sheets:** Managing values, rows, cells, or columns - Formatting sheets and cells - Inserting non-text elements - Using functions - Managing and transforming data - Collaborating and sharing in Sheets - Importing and converting from other file types

Unit III **(2 Hours)**

Working in Slides: Building a presentation - Working with text - Working with non-text elements - Arranging objects - Sharing a presentation. **Google Forms:** Create custom forms -

Create quizzes - Analyze responses – View Individual Responses – Certificate Generation using Certify'em

(20 Hours)

List of Exercises

- Calendar: Create and manage events
- Docs: Create and manage comments and action items, set preference suit your work style, and use the Google Docs Explore tool.
- Drive: Organize, protect, and share files.
- Gmail: Compose, send, and reply to messages.
- Meet & Chat : Manage video meetings and collaborate using instant messages
- Sheets: Create and edit spreadsheets directly in your browser—no other software is required.
- Sheets Advanced Topic: Apply themes and conditional formatting, and use advanced formulas and functions •
- Slides: Create and collaborate on professional presentations for proposals, sales, marketing, or training • Form: To create online forms and surveys with multiple question types.

		ValueAddedCourse: An Introduction to AI CHATBOTFramework	**Semester**	II/IV/VI
Hrs/Week:	2	**TotalHours :**30hrs	**Credits:**	02

Course Objective

The course imparts a sound learning of how artificial intelligence powers ChatBot, get an overview ofthe Bot ecosystemand Bot anatomy, and studydifferent types ofbotsand use cases. Identify best practices for defining a ChatBot use case and use a rapid prototyping framework to develop a use case for a personalized ChatBot.

CourseOutcomes(CO)

K1	CO1	Tounderstandin-depthofconversationdesign,includingonboarding,flows, utterances,entities,andpersonality
K2	CO2	TorealizethescopeofthedifferentapproachesusedtodevelopChatBots
K3	CO3	Toanalyzingtheprocessesfromdemonstrate,test,anditerateafully- functional, interactive ChatBot using a commercial platform.
K4	CO4	To analysis and evaluate the data received through demonstrate how NLP is used in developing ChatBot and Design a ChatBot for public use and interaction.

Syllabus

Unit–I **[10Hours]**

Introduction: Benefits from Chatbots for a Business, A Customer-Centric Approach inFinancial Services, Conversational ChatBot Landscape. **Identifying the Sources of Data**: ChatBot Conversations, Training ChatBot for Conversations, Personal Data in ChatBot, and Introduction to the General Data Protection Regulation (GDPR).

.

Unit-II **[10Hours]**

ChatBot Development Essentials: ChatBot Development Approaches, Rules-Based Approach, AI-Based Approach, Conversational Flow, Key Terms in ChatBot, Utterance, Intent, Entity, Channel, Human Takeover, Use Case: 24x7 Insurance Agent.

UNIT– III **[10Hours]**

Building a ChatBot Solution: Business Considerations, ChatBot Vs Apps, Growth ofMessenger Applications, Direct Contact Vs Chat, Success Metrics, Customer Satisfaction Index, Completion Rate, Bounce Rate, Generic Solution Architecture for Private ChatBot.

Natural Language Processing, Understanding, and Generation: ChatBot Architecture, Popular Open Source NLP and NLU Tools.

Powerpoint Presentations,Seminar,Quiz,andAssignment.

Total Hrs:	30	Exploring the bedrock of Artificial Intelligence	Credit	2

Course Objective

To understand the basic concepts of Artificial Intelligence and identify the AI problems and domains and provide search techniques to solve the problems. To represent and access the domain specific knowledge.

Course Outcomes (CO)

CO Number	CO Statement	Knowledge Level
CO1	Describe the nature of AI problems and techniques of AI, Problem space search and issues in design of search.	K1
CO2	Apply the appropriate Heuristic Search techniques to solve the problems by using various algorithms.	K3
CO3	Select the suitable knowledge representation method and issues.	K4
CO4	Explain Representing simple facts and logic computable functions and predicates using Predicate Logic.	K2
CO5	Compare the Procedural Versus Declarative knowledge, forward and backward reasoning and Matching by Representing the knowledge using Rules.	K4
K1 – Remember K2 – Understand K3 – Apply K4- Analyze K5 – Evaluate K6- Create		

Units	Content	Hrs
Unit I	Introduction: AI Problems – AI techniques – Criteria for success. Problems, Problem Spaces, Search: State space search– Issues in design of Search. Heuristic Search techniques: Generate and Test – Hill Climbing – Best-Fist, Problem Reduction, Constraint Satisfaction, Means-end analysis	10
Unit II	Knowledge representation issues: Representations and mappings – Approaches to Knowledge representations – Issues in Knowledge representations – Frame Problem.	10
Unit III	Using Predicate Logic: Representing simple facts in logic – Representing Instance and Is a relationship. Representing knowledge using rules: Procedural Vs Declarative knowledge – *Logic programming – Forward Vs Backward reasoning* – Matching.	10

Business correspondence is an umbrella term used for any form of written communication that happens in business relationships. It could be with business partners or internal communication within the organization.

Business correspondence is mostly in the form of letters. People related to any business understand the significance of business letters since this correspondence in business communication can be used by them to express themselves, ask a doubt or clarification regarding any uncertainty.

The importance of business correspondence lies in the fact that it is the formal way of exchanging information by which professional relationships are maintained between organizations, employees, and clients. Since it is in a written form, it can serve as a future reference for the information being communicated.

Business correspondence happens daily in the lives of businessmen in the form of letters to suppliers, letters of inquiry, complaint letters, job application letters, and a few other forms.

About the Institution

A nation's growth is in proportion to education and intelligence spread among the masses. Having this idealistic vision, two great philanthropists Late. S.P. Nallamuthu Gounder and Late. Arutchelver Padmabhushan Dr.N.Mahalingam formed an organization called Pollachi Kalvi Kazhagam, which started Nallamuthu Gounder Mahalingam College in 1957, to impart holistic education with an objective to cater to the higher educational needs of those who wish to aspire for excellence in knowledge and values. The College has achieved greater academic distinctions with the introduction of Autonomous System from the academic year 1987-88. The college has been Re-Accredited by NAAC and it is ISO 9001: 2015 Certified Institution. The total student strength is around 6000. Having celebrated its Diamond Jubilee in 2017, the college has blossomed into a premier Post-Graduate and Research Institution, offering 26 UG, 12 PG, 13 M.Phil and 10 Ph.D Programmes, apart from Diploma and Certificate Courses. itution, offering 26 UG, 12 PG, 13 M.Phil and 10 Ph.D Programmes, apart from Diploma and Certificate Courses.

About the Department

The PG Department of Commerce (CA) has been introduced in the college during the academic year 2000 – '01 with the motto of providing quality education in commerce with immense computer background. The thirst for higher education in the field was also being fulfilled by introducing post-graduation programme – M.Com (CA). The department is well equipped with essential computers with internet facility, smart board and with necessary updated software for its staff and students community to get use out of it. It focuses on the recent trends prevailing in the environment and update its curriculum to match it with the industrial needs and enrich the students accordingly to meet out the challenges and get succeeded with the help of team work from the highly qualified faculties of the department.

Learning GST improve the tax calculation knowledge and importance of tax system in India.

Goods and Services Tax (GST) is a successor to VAT used in India on the supply of goods and services. GST is a digitalized form of VAT where you can also track the goods & services. Both VAT and GST have the same taxation slabs. It is a comprehensive, multistage, destination-based tax: comprehensive because it has subsumed almost all the indirect taxes except a few state taxes. Multi-staged as it is, the GST is imposed at every step in the production process, but is meant to be refunded to all parties in the various stages of production other than the final consumer and as a destination-based tax, it is collected from point of consumption and not point of origin like previous taxes.

Internet of Things (IoT)

Aim of the Course

The aim of the course is to provide students to explore interconnection and integration of the physical world and the cyber space.

Course Objective

The course imparts a sound understanding of the basic electronics, microcontroller architectures, sensors, IoT architecture and communication protocols.

Course Outcomes

1. In depth understanding of IoT system, architectures, components and supporting technologies
2. To realize the scope of the IoT, architecture of its networks, devices, programming, data and security
3. Analyzing existing business processes to understand and build technical strategy to develop need aligned technical solutions
4. Analysis and evaluate the data received through sensors in IOT.
5. Design and develop smart city in IOT.

Syllabus

Unit – I **[10 Hours]**

Introduction: Definition and characteristics of IoT – IoT enabling Technologies. IoT Levels – **Domain Specific IoTs**: Home Automation – Cities – Environment.

Unit – II **[10 Hours]**

IoT and M2M: Introduction **-** M2M – Difference between IoT and M2M – Need for IoT system management.

Unit - III **[10 Hours]**

IoT platform design methodology: Introduction **-** IoT design methodology.

IoT Physical devices and End points: What is an IoT Device? – Basic building blocks of an IoT device – Exemplary device: Raspberry Pi – About the Board.

Department of Computer Technology

Value Added Course

Internet of Things (IoT)

Aim of the Course

The aim of the course is to provide students to explore interconnection and integration of the physical world and the cyber space.

Course Objective

The course imparts a sound understanding of the basic electronics, microcontroller architectures, sensors, IoT architecture and communication protocols.

Course Outcomes

1. In depth understanding of IoT system, architectures, components and supporting technologies
2. To realize the scope of the IoT, architecture of its networks, devices, programming, data and security
3. Analyzing existing business processes to understand and build technical strategy to develop need aligned technical solutions
4. Analysis and evaluate the data received through sensors in IOT.
5. Design and develop smart city in IOT.

Syllabus

Unit – I

[10 Hours]

Introduction: Definition and characteristics of IoT – IoT enabling Technologies. IoT Levels – **Domain Specific IoTs:** Home Automation – Cities – Environment.

Unit – II

[10 Hours]

IoT and M2M: Introduction - M2M – Difference between IoT and M2M – Need for IoT system management.

Unit - III

[10 Hours]

IoT platform design methodology: Introduction - IoT design methodology.

Scanned with CamScanner

IoT Physical devices and End points: What is an IoT Device? – Basic building blocks of an IoT device – Exemplary device: Raspberry Pi – About the Board.

Books for Study

INTERNET OF THINGS

Course Coordinators
Ms. K. S. Leelavathi

Course Name: Internet of Things

Duration : 30 Hours

Eligibility : All UG courses

Course fee : Rs. 300/-

AIM OF THE COURSE

The aim of the course is to provide students to explore interconnection and integration of the physical world and the cyber space.

COURSE OBJECTIVE

The course imparts a sound understanding of the basic electronics, microcontroller architectures, sensors, IoT architecture and communication protocols.

All are cordially invited….!!!

DEPARTMENT OF COMPUTER SCIENCE (SF)

VALUE-ADDED COURSE: 21PCSVA1 - BLOCKCHAIN AND CRYTOCURENCY

Class : I M.Sc **Semester: II**

Batch: 2021 – 2023

VISION:

To provide additional learner centric skill oriented technical training to improve the student's employability skills and to provide an opportunity to the students to develop added skills.

MISSION:

To bridge the skill gaps and make students industry ready. To provide an opportunity among students to develop their inter-disciplinary skills.

OBJECTIVE:

The main objective of this course is to impart knowledge on Blockchain and Cryptocurrency and make the students to design, build and deploy distributed applications by integrating the ideas from Blockchain technology.

ABOUT THE COURSE:

The sudden rise in the value of Bitcoin and other Cryptocurrencies, and its subsequent decline, focused the world's attention on Cryptocurrencies as a means of payment. Blockchain technology powers Bitcoin and has been hyped as the next new, transformative technology.

In this course, it is being discussed about the technical underpinnings of blockchain and review key concepts such as decentralization and consensus algorithms. blocks on Bitcoin's blockchain store data about monetary transactions. Today, there are more than 10,000 other cryptocurrency systems running on blockchain. But it turns out that blockchain is actually a reliable way of storing data about other types of transactions as well.

Some companies that have already incorporated blockchain include Walmart, Pfizer, AIG, Siemens, Unilever, and a host of others. For example, IBM has created its Food Trust blockchain to trace the journey that food products take to get to their locations.

Blockchain can eliminate much of the overhead associated with this process and streamline verification procedures, saving educators and administrators time when it comes to things like transfers between schools or states. Using blockchain, an institution accepting a transfer student could verify their record and the courses they took with a few simple clicks. The same concept applies to record sharing with an employer.

BENEFITS:

To save time and money, optimization in the previous technology is most important, and blockchain technology is an optimized version of the technology that plays an important role to maintain and secure your data for a long time.

Blockchain technology is a structure which connected through peer-to-peer nodes and helps to stores transactional records. This storage is referred to as a 'digital ledger. Blockchain is a Decentralized structure that creates trust between different entities. There are many possible reasons to why people invest in bitcoin. One reason is that people believe in the technological advancements that bitcoin (and the blockchain) can bring. This kind of innovation is fascinating to students so they mostly join to learn.

Students can benefit from crypto by learning what is it and why its here. Purely on the fact of being technically literate coupled with the willingness to learn new things. The crypto space is a fantastic opportunity to understand fiat currency, fractional reserve banking systems and government ties to corps. The knowledge is out there and free to learn. The most beneficial aspect of crypto today is the time you put into it. It may seem to go against the norm in many ways but that's the value.

23UIT2A1	GE II – ALLIED II: Mathematics II (Discrete Mathematics)		✓			To build the mathematical skills for programming
23UIT2A2	GE II – ALLIED II: Mathematics II (Operations Research)		✓			To build the mathematical skills for programming
23UIT2S1	SEC I: Naan Mudhalvan : Web Programming Lab. (PHP)	✓	✓			To get better knowledge to build a website.
22UIT307	Operating Systems		✓			To make the computer system convenient to use in an efficient manner
22UIT308	Relational Database Management System			✓		To have a broad understanding of database concepts and database management system software.
22UIT309	CC Lab. III RDBMS			✓		To know well about the basics of Database programming.
22UIT310	Lab. IV Web Designing (HTML,CSS, JavaScript & Angular)	✓				To get better knowledge to build a website.
22UIT3A3	GE III – ALLIED III: Microprocessor and Assembly Language Programming			✓		To meet the requirements of appearing National Eligible Test (NET) and SET
22UIT3N1	Skill Based Non-Major- I (Social Networks)	✓		✓	✓	To prepare students for evaluating the best social media platform(s) for their business
22UIT3N2	Skill Based Non-Major- I (Hardware &Networking)	✓		✓	✓	To understand and Identify the existing configuration of the computers & peripherals.
22UIT411	Data Communication and				✓	To meet the

	Networks					requirements of appearing National Eligible Test (NET) and SET
22UIT412	Advanced Java Programming	✓		✓		To learn test, and debug advanced-level Object-Oriented programs using Java
22UIT413	Programming in Advanced Java			✓		To learn test, and debug advanced-level Object-Oriented programs using Java
22UIT4S1	SEC I: Naan Mudhalvan : Advanced Excel Lab.	✓	✓	✓	✓	To learn and experiment the real time applications
22UIT4A4	GE IV – ALLIED IV: Software Engineering	✓	✓	✓	✓	This broad education is necessary to understand the High impact of software Engineering solutions in local and global, economic, environmental, and societal context
22UIT4N1	Skill Based Non-Major- II (Data Analytics)				✓	To Apply principles of Data Science to the analysis of business problems.
22UIT4N2	Skill Based Non-Major- II (Computer Security)			✓	✓	To prepare students with the technical knowledge and skills needed to protect and defend computer systems and

						networks.
21UIT517	Information Security				✓	To enhance the security of various components using algorithms globally
21UIT518	Open Source Methodologies			✓		To know about designandworking principles of open sourcesoftware.
21UIT5E11	DataMiningand Analytics				✓	Different types of organizations use the technology to harness the data and extract value from it.
21UIT5E12	ArtificialIntelligence		✓	✓	✓	Learningand analyzing the Artificial Intelligence techniques and conceptshelpsin solvingrealworld problems
21UIT5E13	E-Commerce	✓	✓	✓	✓	Utilizing this powerful E-commerce tools wiselyhasbecome eminently important for business-to-business (B2B) companies
21UIT519	Lab.VII-OpenSource Methodologies			✓		To give practical knowledge on commands and editorsavailablein linux platform.

21UIT520	Lab.VIII-Software Testing Tools			✓		Improves ability to usethetechniques, skills,andtorapidly learn and apply emerging software testingtechnologies necessary for SW development and usage.

21UIT5S11	Skill Based Major Elective - Lab. I Web Programming (PHP)	✓	✓			To get better knowledgetobuild a website.
21UIT5S12	Skill Based Major Elective - Lab. I Web Programming (ASP.NET)					To get better knowledgetobuild a website.
21UIT621	Python Programming				✓	Designanddevelop Pythonprogramsin the areas related to web design, cloud computing, IoT and data analytics.
21UIT6E21	R-Programming			✓	✓	Designanddevelop R programs in the areas related toweb design, cloud computing, IoT and data analytics.
21UIT6E22	InternetofThings			✓	✓	The functional aspect of learning IoTistouniteevery object of the world under one common infrastructure;
21UIT6E23	BlockChainTechnology		✓	✓	✓	Abilitytolink knowledge of Computer Science with other auxiliary disciplinesofstudy.
21UIT6E31	MobileComputing	✓		✓		To enable the Students to learn mobile techniques such as 2G, 3G, 4G & 5G

21UIT6E32	ComputerGraphics		✓		✓	To motivate Studentsaboutthe ComputerGraphics fieldbecausethey wanttounderstand how to build fascinating applications like onlinegames.

1.1.1.c

21UIT6E33	CloudComputing		✓	✓	✓	To enhance the effectiveness of various businesses usingcloudstorage globally
21UIT622	Lab.IX-Python Programming			✓		Designanddevelop Pythonprogramsin the areas related to web design, cloud computing, IoT and data analytics.
21UIT623	Project				✓	To give thepracticalknowledge on courses studied throughout and used to develop software.
21UIT6S23	Skill Based Major Elective - Lab. II DTP Software(CorelDraw)	✓	✓			Ability to become anentrepreneurin fieldofadvertising and marketing
21UIT6S24	Skill Based Major Elective - Lab. II DTP Software(Photoshop)	✓	✓			To Demonstrate Photoshop related and transferable skills that are relevant toindustry and employment opportunity

PG COMPUTER SCIENCE						
Programme: M.Sc Computer Science						Year: 2022
Course Code	Course Title	Need				Rationale
		Local	National	Regional	Global	
22PCS311	Internet of Things				✓	Have devices that self report in real-time, improving efficiency and bringing important information to the surface more quickly than a system depending on human intervention.
22PCS312	Full Stack Web Development				✓	Provides an unparalleled freedom to simultaneously work on the front- and backend, faster development and delivery
22PCS313	Python Programming				✓	Most accessible programming languages available because it has simplified syntax
22PCS314	Digital Image Processing		✓			Extract from an image quantitative information that is not readily apparent to the eye, and to calibrate an image in photometric or geometric terms
22PCS1E1	Advanced Networks		✓			Share information effortlessly, increasing productivity and efficiency, other

						benefits include cost-effectiveness, storage efficiency, flexibility, and data security
22PCS1E2	Wireless Networks				✓	Plays a key role in today's communications, and new forms of it will become central to emerging technologies including robots, drones, self-driving vehicles and new medical devices
22PCS1E3	Network Security & Cryptography				✓	A stable and efficient network security system is essential to protecting client data
22PCS2E1	Software Project Management	✓				Important role in an organization by giving insights into project progress, performance, and inventory tracking
22PCS2E2	Software Engineering and Testing	✓				Application of principles used in the field of engineering, which usually deals with physical systems, to the design, development, testing and deployment of software systems
22PCS2E3	Object Oriented Analysis and Design with UML	✓				Helps to visualize, specify, construct, and document the artifacts of an object-oriented system
22PCS3E1	Artificial Intelligence & Machine Learning				✓	Makes it possible for machines to learn from experience, adjust to

						new inputs and perform human-like tasks
22PCS3E2	Natural Language Processing and Text Analytics				✓	Helps to analyze the data collected from various sources, such as social media profiles, customer surveys, employee surveys, and other feedback tools and
22PCS3E3	Robotic Process Automation for Business				✓	Automate various supply chain processes, including data entry, predictive maintenance and after-sales service support
22PCS3P1	Pilot Project – I				✓	Enables to manage the risk of a new idea and identify any deficiencies before substantial resources are committed
22PCS4P2	Project Work and Viva-Voce				✓	Explore the various functional areas and analyze how theoretical concepts taught are applied in real life situations

List of Courses having focus on local, national, regionaland global developmental needs offered by the Department of Computer Technology

DEPARTMENT OF COMPUTER TECHNOLOGY						
Programme: Computer Technology						Year:2023-24
Course Code	Course Title	Need				Rationale
		Local	National	Regional	Global	
21 UCT 517	Core Course XI: Open Source Technologies	✓		✓		The students of this Programme can be web developers would be able to write dynamic interactive web based applications using PHP and MYSQL database. After mastering this course they may work as self-employed web page developer.
21 UCT 518	CORE COURSE XII: Information Security		✓		✓	The concepts needed to read through the ripe in the market place and understanding risks and how to deal with them. The student will have a Perspective on security in general and better understanding to reduce and manage the security risks.
21UCT5E1	DSE - I : Cloud Computing			✓	✓	The course curriculum has been designed keeping in view the emerging trends in advanced computing as well as contemporary and futuristic human resource requirements of the IT industry.
21UCT5E2	DSE – I: Embedded Systems			✓		Embedded system design and programming skills for

						different commercial and industrial applications are enhanced
21UCT5E3	DSE – I: Management Information system	✓				This module is designed for those candidates who are, or will be, in a position to make or influence decisions related to the selection, design and support of management information systems (MIS).
21UCT520	CORE COURSE Lab VIII: Web Designing			✓		This course will enable the students to understand the basics of internet and Various applications of internet like e-mail, FTP, Telnet, Newsgroups and videoconferencing. In addition, this course develops competency amongst the students to design professional with sites and interactive web pages and manage advanced content and sites quickly and efficiently.
21UCT5S1	Skill Based Major Elective - I : Python Lab				✓	This course is designed to offer the student a well-rounded introduction to programming in Python, including a significant amount of practical application through the completion

						of programming exercises, such that after completing the course, the student will have a sound understanding of the basics of programming in Python.
21UCT621	CORE COURSE- XIII : Framework Technology		✓			FrameworkTechnology offers easy learning, RAD capabilities, legacy code support, .NET framework integration, OOP, security features, community support, and multi-platform development, making it suitable for diverse applications.
21UCT6E1	DSE- II : MobileComputing				✓	Mobile computing enables on-the-go access to information, communication, and services via portable devices, fostering convenience, productivity, and real-time connectivity in today's dynamic and mobile-centric world.
21UCT 6E4	DSE - III : Artificial Intelligence				✓	Artificial Intelligence enhances automation, problem-solving, and decision-making through algorithms, enabling machines to mimic human intelligence. It transforms industries, driving innovation,

						efficiency, and personalized user experiences.
21 UCT 623	Project				✓	Experience the project program that affords them the opportunity to match classroom learning with on the-job reality. Adapt to developments in the field and be enriched by active involvement in the field of project. Students are encouraged to take up projects in association with local and regional industries or carry out research projects based on issues in the immediate community
22UCT307	Core Course V: Advanced Java Programming				✓	This course is designed to teach the student how to write, test, and debug advanced-level Object-Oriented programs using Java with a heavy emphasis toward network and web programming.
22UCT308	Core Course VI: Database Management System		✓			This course will acquaint the student with knowledge of fundamentals concepts of DBMS and its application in different areas, storage, manipulation and retrieval of data using query languages
22UCT3A3	GE: Allied - III : Software Engineering				✓	Software engineering systematically applies engineering principles to design, develop, test, and maintain reliable and scalable software

						solutions, ensuring efficiency, quality, and meeting user needs in diverse applications.
22UCT3N1 / 22UCT3N2	Non Major Elective - I : HTML Lab / Multimedia Lab		✓			Web development in general is to build a foundation of skills creating web pages. However, this course develops competency amongst the students to learn up-to-date information, e.g., HTML5 and CSS3 and design principles, e.g., proximity, alignment, contrast, and navigation design to meet current requirements in the highly competitive job market.
22UCT411	Core Course VII: Python Programming				✓	Python programming offers simplicity, readability, and versatility. Its extensive libraries empower developers to build applications efficiently, fostering rapid development and facilitating solutions across diverse domains.
22UCT412	Core Course VIII: LinuxAnd Shell Programming		✓		✓	The purpose of this subject is to cover the concepts, Installation Process, Hardware Requirements and features of Unix/Linux. Basic Commands & Shell Programming.
22UCT4A4	GE IV : Allied IV: Data Communication And Networks		✓			Data Communication and Networks enable seamless information exchange. Understanding them is crucial for designing,

						implementing, and managing efficient communication systems, fostering global connectivity and collaboration.
22UCT4N3/ 22UCT4N4	Non-Major Elective II – Office Automation Lab / CorelDraw Lab			✓		Office Automation Lab enhances productivity by integrating technology into office tasks. It equips users with skills to automate processes, manage data efficiently, and utilize office tools effectively.
23UCT101	**CC I**: Programming in C				✓	In order to enable the students use the computers effectively in problem solving, this course offers the modern programming Language C along with exposition to various applications of computers.
23UCT102	**CC II**: Digital Fundamentals and Computer Organization			✓		This course has been designed to make the students know about the fundamental principles of digital electronics and gain familiarity with the available IC chips and the broad field of digital systems design.
23UCT204	**CC III**: Java programming				✓	This course develop necessary skills in students to apply object oriented programming techniques in java so that the students will be able to develop complete applications using core java.
23UCT2A1	**GE II – Allied II**: Mathematics II – Operations Research	✓				Optimization techniques and to solve many practical problems in

						inventory control and capital budgeting problem and Queuing theory update the knowledge for all the three needs

DEPARTMENT OF COMMERCE-BUSINESS PROCESS SERVICES						
Programme: B.COM.BPS						Year: 2023-2026
Course Code	Course Title	Need				Rationale
		Local	National	Regional	Global	
23UBP101	**CC I**: Financial Accounting		✔			Preparation of various financial statements
23 UBP102	**CC II**: Introduction to Information Technology				✔	Gain knowledge of computer systems and information technology
23 UBP 1A1	**GE I – Allied I**: Business Economics				✔	Application of economic concepts for business decision making
23 UBP 1A2	**GE I – Allied I**: Principles of Management				✔	Application of management principles and techniques
23 UBP 203	**CCIII:** Higher Financial Accounting		✔			Deal with accounts of a partnership firm
23 UBP 204	**CC IV**: *Accounting for Finance and Corporate*				✔	Understand the Finance and Accounting Process applied in corporate sectors
23 UBP 205	**CC LabI**: Programming Language- Business Application Software and Google Workspace				✔	Deploy the software skill in business

23 UBP 2A1	**GE II – Allied II**: Business organization and office Management		✔			Understand the forms of organizations and functioning of stock exchange
23 UBP 2A2	**GE II – Allied II**: Banking Law and Practice		✔			Provide knowledge about the working of a bank
23 UBP 2S1	**SEC I: Naan Mudhalvan** : Security Markets	✔				Create awareness about Security Markets
23UBP306	**CCV**: Corporate Accounting		✔			Preparing financial statement of joint stock company
23 UBP 307	**CC VI**: *Principles and Practices of Insurance*			✔		Evaluate the life and non insurance policies
23 UBP 308	**CC VII**: Case Analysis				✔	Develop analytical skills, problem solving abilities and decision making strategies
23 UBP 3A1	**GE III – Allied III**: Business Mathematics				✔	Developing proficiency in analytical reasoning
23 UBP 3A2	**GE III – Allied III**: Computer Application Practical- Computational Finance Using Spread Sheet				✔	Execute and evaluate all the tools and techniques of excel
23 UBP 3N1	**Non-Major Elective I:** Entrepreneurial Development				✔	Development of Entrepreneurship as a Profession

23 UBP.3N2	**Non-Major Elective I:** Advertising and Sales Promotion		✔			Understand how advertisement is used as a tool to achieve marketing Objectives
23UBP409	**CC VIII**: Income Tax		✔			Apply the income tax laws for computation of an individual's taxable income
23 UBP 410	**CC IX**: *Organizational Behaviour*			✔		Familiarize the participants with the behavioural patterns of human beings at individual and group levels in the context of an Organization
23 UBP 411	**CCLabII**: Programming Lab in Tally		✔			Developing software skills among the students
23 UBP 4A1	**GE IV – Allied IV**: Statistical Methods				✔	Proficiency in basic statistical skills
23 UBP 4A2	Operational Research				✔	Gain knowledge on Research Management Techniques
23 UBP 4S1	**SEC II**: **Naan Mudhalvan:** Industry 4.0		✔			Learn the applications and tools of Industry 4.0

23 UBP 4N1	**Non-Major Elective Paper -II :** Project Management	✔				Evaluate the issues required in managing customer satisfaction and service quality
23 UBP 4N2	**Non-Major Elective Paper -II :** Service Marketing	✔				Demonstrate effective leadership and manage the selection and initiation of individual projects
23UBP512	**CC X**: Cost Accounting		✔			Analyze the elements of cost involved in various processes
23 UBP 513	**CCXI**: Investment Management				✔	Evaluate the various financial instruments
23 UBP 514	**CCXII:** *Campus to Corporate*		✔			Expose into the challenges faced by the fresher/ new entrants in the corporate life
23 UBP 515	**CCXIII**: *Banking For BPS*				✔	Real time usage of banking functions and its activities
23 UBP 516	**CC XIV**: Institutional Training		✔			Training will develop intermediate to advanced

						knowledge and skills
23 UBP 5E1	**DSE-I#**: Commercial Law				✔	Evaluate the principles and legal techniques to resolve practical problems in the area of commercial law
23 UBP 5E2	**DSE-I#**: Brand Management			✔		Understand how marketers apply branding to their strategic advantage
23 UBP 5E3	**DSE-I#**: Auditing Principles and Practices		✔			Implement the audit process from planning of audit to completion of audit
23 UBP 5S1	**SEC III**: *Market Research*				✔	Preparation marketing research report and make presentation of the research result.
23 UBP 5S2	**SEC III**: Human Resource Management			✔		Examine the current issues, trends practices and processes in HRM
23 UBP 617	**CC XV** : Management Accounting		✔			Analyze financial statement to help managerial decision making

23 UBP 618	**CC XVI**: Supply Chain Management				✔	Analyse the smooth transition of goods and services from manufacturers to the customers
23 UBP 619	**CC XVII:** Business Process Management				✔	Understand ethical obligations and responsibilities of business
23 UBP 6E4	**DSE–II[##]:** Ecommerce and Information Security				✔	Review legal issues and privacy in e-commerce and recognize global e-commerce issues
23 UBP 6E5	**DSE–II[##]:** Security Analysis and Portfolio Management		✔			Analyze the performance of a selected portfolio for a certain period
23 UBP 6E6	**DSE–II[##]:** Financial Management		✔			Understand how to take capital budgeting and investment decisions
23 UBP 6E7	**DSE–III[###]:** Company Law and Secretarial Practice		✔			Knowledge and understanding the provisions of the Companies Act, 2013
23 UBP 6E8	**DSE–III[###]:** International Business				✔	Expose the students to the trade operations in the International

						Scenario
23 UBP 6E9	**DSE–III[###]:** Business Communication				✔	Skill of drafting business letters
23 UBP 6S1	**SEC IV:** **Naan Mudhalvan**: Goods and Service Tax			✔		Evaluate the rules and regulations of Goods and Service Tax Act
23 UBP 6S2	**SEC IV:** **Naan Mudhalvan** Mutual Fund Foundation	✔				Evaluate the performance of mutual funds using appropriate metrics and benchmarks

List of Courses having focus on Local, National, Regional, Global Developmental needs offered by the B.Sc Computer Science with Data Analytics - 2023-2026

B.Sc Computer Science with Data Analytics						
Programme :B.Sc Computer Science with Data Analytics						**Year : 2023**
Course Code	**Course Title**	**Need**				**Rationale**
		Local	**National**	**Regional**	**Global**	
23UDA101	**Core Course I:** Programming in C	✓	✓	✓	✓	Despite the prevalence ofhigher-level languages, C continues to empower the world.Microsoft's Windows kernel, Linux Kemel, Mac OS X kernel,iOS, Android and Windows Phone kernels are written in C.The world's most popular databases like MySQL, Oracle Database, MS SQL server, PostgreSQL are coded in C. Efficiently work on enterprise applications, games, graphics, and applications requiring calculations
23UDA102	**Core Course II:** Digital Electronics		✓	✓		Digital Electronics gives the basic building blocks of every computing machine in the world. Digital logic deals with the building blocks on which most topics in Computer Organization and Architecture are based like combinational and sequential circuits, gates, decoders, multiplexers, etc.
23UDA1A1/ 23UDA1A2	**Generic Elective – Allied I:** Mathematical Foundation for Data Science/	✓	✓	✓	✓	Mathematical Foundation for data science provides the basis for data analysis. It comprises of the concept of Discrete Maths which is the mathematical language

	Numerical Methods					of computer science. Concepts and notations from discrete mathematics are useful in studying and describing objects and problems in all branches of computer science, such as computer algorithms, programming languages, cryptography, automated theorem proving, and software development. Numerical methods are another important concept for data analysis applications
23UDA103	**Core Course Lab I:** Programming Lab in C	✓	✓	✓	✓	C programming language continues to empower the world. Embedded systems are most commonly programmed in the C language, due to the Ianguage's features offlexibility. efficiency, performance, portability and closeness to the hardware. All ofthese features allow C to have applications across every domain in the world of programming. C is used in almost all the desktop operating systems, mobile OS and even in programming robots.
23UDA204	**Core Course III:** Problem Solving using Python	✓	✓	✓	✓	Python language helps to do task automation, conduct complex statistical calculation, build machine learning models, manipulate and analyse data for all kind of businesses and present results using visualizations for real datasets

23UDA205	**Core Course IV:** Data Structures	✓	✓	✓	✓	Data Structures and Algorithm implementation is used to test analytical skills as it is useful tool to pick out the underlying algorithm in real world and solve them efficiently. A specialized format for organizing, processing, retrieving and storing data and files
23UDA2A1/ 23UDA2A2	**Generic Elective Allied II:** Statistics and Probability/ Optimization Techniques	✓	✓	✓	✓	Statistical analysis is one of the most widely used application in the world today and is used in almost every industry, ranging from finance, banking to medicine and manufacturing, Banking, Healthcare, Social Media, ECommerce and Manufacturing. . It is also used in analyzing and interpreting various Indian Government projects, schemes and laws by extracting the data from social networks. A Powerful approach to decision making byachieving more complete datasets, considering all available options, predict all possible outcomes and estimate risk
23UDA206	**Core Course Lab II:** Programming Lab in Python	✓	✓	✓	✓	Python language helps to do task automation, conduct complex statistical calculation, build machine learning models, manipulate and analyse data for all kind of businesses and present results using visualizations for real datasets

23UDA2S1	**SEC I: Naan Mudhalvan** Cloud Essentials	✓	✓	✓	✓	Cloud infrastructures support environmental proactivity, powering virtual services rather than physical products and hardware, and cutting down on paper waste, improving energy efficiency, and (access from anywhere with an internet connection) reducing commuter-related emissions. Hosting on cloud is more environmentally friendly and results in less a carbon footprint.

List of Courses having focus on Local, National, Regional, Global Developmental needs offered by the B.Sc Computer Science with Data Analytics – 2022-2025

B.Sc Computer Science with Data Analytics						
Programme :B.Sc Computer Science with Data Analytics						**Year : 2022**
Course Code	**Course Title**	**Need**				**Rationale**
		Local	**National**	**Regional**	**Global**	
22UDA308	**Core V: Problem Solving usingPython**	✓	✓	✓	✓	Python language helps to do task automation, conduct complex statistical calculation, build machine learning models, manipulate and analyse data for all kind of businesses and present results using visualizations for real datasets
22UDA309	**Core VI: Relational DatabaseManagement System**	✓	✓	✓	✓	Provides an interface between users and applications and the database, as well as administrative functions for managing data storage, access, and performance. A software which is used to store, manage, query, and retrieve data stored in a relational database
22UDA3A1/ 22UDA3A2	**Allied III: Introduction toLinear Algebra/ Applied Statistics**					The concepts of linear algebra play a very crucial role for understanding the theory behind data science. It helps in understanding the intuition behind the functionality of the algorithm in the background. Linear algebra provides essential tools for solving

		✓	✓	✓	✓	optimization problems and solving systems of linear equations. With the help of Linear Algebra, we can build supervised learning algorithms from scratch, such as support vector machines, decision trees, logistic regression, and linear regression (SVM). Statistical analysis is one of the most widely used application in the world today and is used in almost every industry, ranging from finance, banking to medicine and manufacturing, Banking, Healthcare, Social Media, ECommerce and Manufacturing.
22UDA310	**Core Lab III:** **Programming Lab in Python**	✓	✓	✓	✓	Python language helps to do task automation, conduct complex statistical calculation, build machine learning models, manipulate and analyse data for all kind of businesses and present results using visualizations for real datasets
22UDA311	**Core Lab IV:** **RDBMS Lab**	✓	✓	✓	✓	Provides an interface between users and applications and the database, as well as administrative functions for managing data storage, access, and performance. A software which is used to store, manage, query, and retrieve data stored in a relational database
22UDA3N1/ 22UDA3N2	**NME I: Web Designingusing HTML and**					Web Designing using HTML provides the raw tools needed to structure

	CSS/Adobe Photoshop	✓	✓	✓	✓	the content on a website. With the interactive pages and navigation, web developers create stylish and captivating websites. Web developers write code and set up the software to add complicated features and cutting-edge functionality to websites and portals. Provides many image editing features for pixel-based images, raster graphics and vector graphics
22UDA412	**Core VII:** **R Programming in DataScience**	✓	✓	✓	✓	With the emergence of Big Data, the Data Science field has become one of the most popular fields today. Companies possess valuable data, and there is a strong need to leverage the information present in this data to generate meaningful insights for decision-making. A proper and detailed data analysis is required to generate these insights with the help of several tools. R is a popular programming language for data analysis, processing, transformation, and visualization.R provides an environment for statistical analysis. It offers statistical and graphical capabilities. R can be used for classification, clustering, statistical tests, and linear and nonlinear modeling.

22UDA413	**Core VIII:** **Data Mining**	✓	✓	✓	✓	Since we live and work in a data-centric world, it's essential to get as many advantages as possible. Data mining provides us with the means of resolving problems and issues in this challenging information age. Data mining is the process of analyzing a large batch of information to discern trends and patterns. Data scientists can use the information to detect fraud, build risk models, and improve product safety. It helps data scientists quickly initiate automated predictions of behaviors and trends and discover hidden patterns
22UDA4A1/ 22UDA4A2	**Allied IV:** **Fundamentals of CloudComputing/ Internet of Things**	✓	✓	✓	✓	Cloud infrastructures support environmental proactivity, powering virtual services rather than physical products and hardware, and cutting down on paper waste, improving energy efficiency, and (access from anywhere with an internet connection) reducing commuter-related emissions. Hosting on cloud is more environmentally friendly and results in less a carbon footprint. Internet of things has been gaining importance globally, both for industrial and everyday use. It makes lives better with smart homes, predictive maintenance with comfortable and safe

						driving experience, smart wear and so on. IoT allows companies to automate processes and save money on labour
22UDA414	**Core Lab V** **Programming Lab in R**	✓	✓	✓	✓	R is an advanced language that performs various complex statistical computations and calculations. Therefore, it is widely used by data scientists and business leaders in multiple fields, from academics to business. Moreover, R interprets the data in a graphical form, making it easy to interpret and understand
22UDA415	**Core Lab VI** **Data Mining Lab**	✓	✓	✓	✓	Provides a practical approach to data mining with large volumes of complex data; prepare, cleanse and explore data; supervised and unsupervised modelling with association rules and market basket analysis, decision trees, multi-layer neural networks, k-nearest neighbours, k-means clustering and self-organising maps, ensemble and bundling techniques, text mining; use of leading software tools; business examples and research literature.
22UDA4S1/ 22UDA4S2	**SEC I : Naan Mudhalvan** **Data Science Foundation/** **Microsoft Office Fundamentals**	✓	✓	✓	✓	Data Science Foundations speaks about the fundamental statistical theories and methods, life cycle, and tasks in Data Science procedures. These fundamentals can be applied to learn advanced

						concepts in Data Science and solve real-time problems more efficiently. Provides the basics of cleaning, analyzing and visualizing data. Provides the industry standard languages and libraries including python, numpy, panda and matplotlib. Microsoft Office is a suite of applications designed to help with productivity and completing common tasks on a computer. We can create and edit documents containing text and images, work with data in spreadsheets and databases, and create presentations and posters.
22UDA4N1/ 22UDA4N2	**NME II: Data Analysis usingExcel/ Office Automation Tools**	✓	✓	✓	✓	Analyze Data in Excel empowers us to understand our data through natural language queries that allow us to ask questions about our data without having to write complicated formulas. In addition, Analyze Data provides high-level visual summaries, trends, and patterns. An **office automation** is a tool that enables data to move from one system to another on its own without human intervention and inaccuracies. These tools help organizations collect, manage, and analyze securely to accomplish everyday tasks and

						processes. It optimizes and automates existing business processes and procedures.

List of Courses having focus on local, national, regional and global developmental needs offered by the PG and Research Department of Botany

PG and Research Department of Botany						
Programme: M.Sc., Botany						Year: 2023 -2025
Course Code	Course Title	Need				Rationale
		Local	National	Regional	Global	
23PBY101	Plant Diversity I	✔	✔	-	-	Utilizing the algae and fungi as food, medicine, fertilizer and algae as indicators of pollution.
23PBY102	Plant Diversity II	✔	✔	-	-	Identifying the ecology and evolutionary significances of Bryophytes, Pteridophytes and Gymnosperms in environmental sustainability.
23PBY103	Applied Microbiology and Plant Pathology	✔	✔	✔	-	Knowledge about microbes. Knowledge about plant infectious microbes and their diagnostic methods
23PBY1E1	Ecology and Phytogeography	-	-	-	✔	To understand the mechanism of environmental and biodiversity management
23PBY1E2	Ethno Botany	✔	-	-	✔	To study the local herbs and their medicinal properties to treat diseases
	Seed technology	✔	✔	-	-	Awareness on storage reserves in seeds, seed longivity and seed

						viability to quality yield of crops.
23PBY207	Cytology, Genetics and Plant Breeding	-	-	-	✔	To study genes and their mode of expression Awareness on the conventional methods of plant breeding to producing new variety.
23PBY2E4	**Elective2** Horticulture and Landscaping	✔	-	-	-	To understand the principle and techniques of improving horticultural plants
23PBY2E5	IPR and Bioethics	-	✔	-	-	Fundamentals of patenting, copyright and trademark
23PBY2E6	Organic farming	✔	-	-	-	The preparation and application of organic manures locally
23PBY2N1	**Non- Major Elective 1** Industrial Botany	✔	✔	-	-	Fiber yielding plants, Antibiotics from algae and fungi

Course Code	Course Title	Need				Rationale
		Local	National	Regional	Global	
22PBY309	Taxonomy of Angiosperms	✔	✔	-	-	To learn the method of identifying plants to arrive at local and national flora
22PBY310	Plant Biochemistry and Biophysics	-	-	-	✔	Knowledge in the synthesis of biomolecules and their role in metabolic pathways along with their regulation.
22PBY311	Plant Biotechnology and Nanobiology	-	-	-	✔	Demonstrates the role of transgenic plants and bionano particles in the fields of medicine, agriculture and environment. To inculcate the techniques of plant tissue culture, so that students can get placed in plant tissue culture industries
22PBY312	**Laboratory course - III**	✔	✔	✔	-	Accurate identification of plants for stake holders
22PBY313	**Laboratory course - IV**	✔	✔	✔		Knowledge on the

						preparation of solutions, to carry out the experiments on biochemistry and plant tissue culture.
22PBY3E7	Forestry and wood science	✔	✔	✔	-	Manufacturing the value added products from non timber forest products
22PBY3E8	Herbal Technology	-	-	✔	-	To learn the medicinal value of plants and the students will study the medicinally used traditional herbs
22PBY3E9	Pharmacognosy	-	✔	-	-	To study the medicinal plants and their utilization in the preparation of herbal pharmacueticals
22PBY413	Research Methodology	-	-	-	✔	Scientific understanding of analytical techniques and detail interpretation of results.
22PBY414	Bioinformatics and Cyber Security	-	-	-	✔	Modern competences in the handling of bioinformatics tools.

20 UBM518	**Major Elective-II:** PC Software(MS Office) Practical				✔	To execute know the various applications of MS Office
20 UBM5S1/ 20 UBM5S2	SBE: (Major) Services Marketing/ Concepts of Rural Marketing Management		✔			To recognize the strategies for managing and marketing of services. To analyze the marketing strategies that are unique to Rural india
20 UBM619	Core-XVII : Investment and Portfolio Management				✔	To impart the knowledge about the functions and importance of Portfolio management.
20UBM620	Core-XVIII : Consumer Behaviour		✔			To execute the knowledge obtained to innovate the product.
20 UBM621	Core-XIX : Advertising and Sales Promotion		✔			To evoke idea about advertising and sales promotion
20 UBM622	Core-XX : Business Environment				✔	To analyze the differences between business and government
20 UBM623	Core-XXI : Project Work and Viva-Voce					
20 UBM624	Major Elective-III : Internet and E-Commerce & Information Security				✔	To recognize the application and significance of e-business.
20 UBM6254	Major Elective-IV: HTML Practical	✔				To execute markup language in web page designs
20 UBM6S3/ 20 UBM6S4	SBE: (Major)Logistics Management/ Agricultural Marketing Management			✔		To apprehend the logistics methods storage systems and material handling. To evaluate the knowledge of students in agricultural marketing, role of credit agencies in India

Programme: B.Sc. Botany						**2020 Batch - V and VI Semesters** **2021 Batch - III and IV Semesters** **2022 Batch - I and II Semesters**
Course Code	**Course Title**	**Need**				**Rationale**
		Local	**National**	**Regional**	**Global**	
20UBY507	Taxonomy of Angiosperms				✓	To create interest in identification of plants using Floral characters and Plant morphology
20UBY508	Microbiology and plant pathology				✓	To understand the basic concepts of microbes and its pathogenicity
20UBY509	Genetics and Evolution		✓			To study the genetic traits and Molecular markers.
20UBY510	Biotechnology & Genetic Engineering				✓	To understand the molecular techniques in order to successfully perform gene manipulation
20UBY511	Mathematics for Biologists				✓	To update the students with modern trends in Plant biology and introduce the interdisciplinary approach
20UBY612	Plant Physiology			✓		To study the cellular functions and understand the metabolism of plants

20UBY613	Economic & Ethno Botany	✓				To bring entrepreneurial interest from the available bioresources
20UBY614	Horticulture & Plant Breeding	✓		✓		To familiarize the art of growing plants indoor, outdoor and motivate the students to go for a start-up.
20UBY615	Bioinformatics		✓			To introduce the modern trends in Plant biology and encourages students work as medical coders
20UBY616	Habitat Ecology		✓			To create interest in understanding various biomes
20UBY617	Major Practical III			✓		To get hands-on training and practical knowledge in identifying local plants, preparing herbarium, quantifying biomolecules and other basic techniques.
20UBY618	Major Practical IV			✓		To get practical knowledge in understanding Plant functions, plant resources and Bioinformatics tools
20UBY6S3	Forest Botany		✓			To familiarize the forest types and their importance and to motivate the students to conserver the Biodeiversity
21UBY304	Anatomy and Embryology			✓		To know the structure and functions of plant cell, tissues, organs, embryo.

21UBY405	Cell Biology, Biochemistry & Biophysics			✓		To get a knowledge on cellular structures, its components, biomolecules and techniques to quantify the biomolecules
21UBY406	Major Practical-II		✓			To get hands-on training and practical knowledge in the preparation of microsections, quantifying biomolecules and other basic techniques.
21UBY3N1	Landscape designing	✓		✓		To introduce the landscape designing methods and motivate the students to prepare Nurseries with entrepreneurial interest.
21UBY4N3	Skill Based Elective – Remote sensing & Natural Resource Management		✓			To make understand interdisciplinary approach is essential in appreciating, managing and protecting natural resources.
22UBY101	Plant Diversity I (Phycology, Mycology and Bryology)	✓				To appreciate and understand the diversity of cellular forms, lower plants to higher plants.
22UBY202	Plant Diversity II (Pteridophytes Gymnosperms and Palaeobotany)		✓			To comprehend the progressive evolution of plants and understand the major evolutionary evidences like plant fossils.

22UBY203	Major Practical I – Paper III Plant diversity I & II (Phycology, Mycology and Bryology &Pteridophytes Gymnosperms and Palaeobotany)				✓	Develop the skill of taking microsections, identify lower plants studied and to draw biological sketches.

Course Code	**Course Title**	**Need**				**Rationale**
		Local	**National**	**Regional**	**Global**	
20UCS517	Core XI: Linux		✔			Linux kernel and application programs supports their installation on any kind of hardware platform.
20UCS518	Core XII: Kotlin Programming				✔	Kotlin is a proven technology for building cross-platform mobile applications and being the official language for Android development.
20UCS519	Core XIII: Cyber Security		✔			Cyber security is important because it protects all categories of data from theft and damage.
20UCS5E1/ 20UCS5E2/ 20UCS5E3	Core Elective-I: Software Engineering & Testing Distributed Computing Client/Server Technology		✔			determine how the different types of testing should be performed by identifying areas of the system where those aspects were considered during development. Distributed computing can allow an application on one machine to leverage processing power, memory, or storage on another machine.

						The client-server approach enables any general-purpose computer to expand its capabilities by utilizing the shared resources of other hosts.
20UCS520	Core Lab VII: Linux Lab				✔	Linux kernel and application programs supports their installation on any kind of hardware platform.
20UCS521	Core Lab VIII: Programming lab using Kotlin		✔			Kotlin is a proven technology for building cross-platform mobile applications and being the official language for Android development.
20UCS622	Core XIV: R Programming		✔			it has simplified syntax and not complicated, which gives more emphasis on natural language.
20UCS6E4 20UCS6E5 20UCS6E6	Core Elective – II: Data mining and Warehousing Big data Analytics Grid and Cloud Computing				✔	the process of finding anomalies, patterns and correlations within large data sets to predict outcomes. helps organizations harness their data and use it to identify new opportunities. Grid computing is a group of networked computers which work together as a virtual supercomputer to perform large tasks, such as analysing huge sets of data or weather modeling.
20UCS6E7 20UCS6E8	Core Elective – III: E-Commerce		✔			**help companies in many ways to improve their business**. The Internet allows a company to lower cost

20UCS6E9	Enterprise Resource Planning Management Information System					dramatically across the supply chain, add additional dimensions to customer service. used by organizations looking to manage their business functions within a centralized and integrated system. MIS, collects data from many different sources and then processes and organizes that data to help businesses make decisions.
20UCS623	Core Lab IX: R Programming Lab		✔			it has simplified syntax and not complicated, which gives more emphasis on natural language.
20UCS624	Core Lab X: Advanced Applications in MS Excel Lab				✔	Excel allows employees to deal and do calculations and this speeds up productivity.
20UCS625	Project				✔	a statement of facts explaining the background of the project.

PG COMPUTER SCIENCE						
Programme: M.Sc Computer Science						Year: 2021- 2023
Course Code	Course Title	Need				Rationale
		Local	National	Regional	Global	
21PCS313	Advanced Python Programming				✓	Data Science and Machine Learning: Python libraries like NumPy, Pandas, and TensorFlow make it the language of choice for data analysis and machine learning, Automation and Scripting.
21PCS314	Android Programming				✓	Android is an Open Source operating system. It is a Linux-based mobile operating system that makes the source code freely available for anyone to use.
21PCS315	Network Security & Cryptography				✓	Cryptography ensures data confidentiality and provides data protection from unauthorized access. Network security protects the sensitive data of clients and it protects the network from ransom ware.
21PCS316	Programming Lab V : Advanced		✓			Python can build a wide range of different data

	Python Programming Lab					visualizations, like line and bar graphs, pie charts, histograms, and 3D plots. Python also has a number of libraries that enable coders to write programs for data analysis and machine learning more quickly and efficiently.
21PCS317	Programming Lab VI : Android Programming Lab		✓			Android app development can assist a business in reaching out to more customers, improve its sales, improve its brand image and create a loyal customer base. It can lay the base for the success of any business.
21PCS3E1	Artificial Intelligence and Expert Systems				✓	An expert system is a computer program that uses artificial intelligence (AI) technologies to simulate the judgment and behavior of a human or an organization that has expertise and experience in a particular field.
21PCS3E2	Machine Learning				✓	Machine learning allows the user to feed a computer algorithm an immense amount of data and have the computer analyze and make data-driven recommendations and decisions based on only the input

						data.
21PCS3E3	Embedded Systems	✓				An embedded system is a computer system with a particular defined function within a larger mechanical or electrical system. They control many devices in common use.
21PCS4P2	Project Work and Viva-Voce				✓	The 'project justification,' 'problem statement,' or 'project background' is an argument in favor of implementing the proposed project. It gives a detailed explanation of why the project is required.

PG COMPUTER SCIENCE						
Programme: M.Sc Computer Science						Year: 2022 - 2024
Course Code	Course Title	Need				Rationale
		Local	National	Regional	Global	
22PCS101	Design & Analysis of Algorithms	✓				It helps to design and analyze the logic on how the program will work before developing the actual code for a program
22PCS102	Data Mining using R		✓			Extract valuable information from available data, uncovering patterns and finding anomalies and relationships in large datasets
22PCS103	Advanced Operating System		✓			An operating system can manage how to divide the program so that it runs on more than one processor at a time
22PCS104	Advanced Java Programming		✓			Provides libraries to understand the concept of Client-Server architecture for web- based applications
22PCS206	Android Programming				✓	Address the business requirements and build new applications or services for smart devices
22PCS207	Cloud Computing				✓	Provides flexible resource allocation on demand with the promise of realizing

						elastic, Internet-accessible, computing on a pay-as-you-go basis
22PCS208	Big Data Analytics				✓	Leads to smarter business moves, more efficient operations
22PCS209	Advanced Database Management System				✓	Provides a centralized view of data that can be accessed by multiple users, from multiple locations, in a controlled manner
22PCS1E1	Advanced Networks		✓			Share information effortlessly, increasing productivity and efficiency, other benefits include cost-effectiveness, storage efficiency, flexibility, and data security
22PCS1E2	Wireless Networks				✓	Plays a key role in today's communications, and new forms of it will become central to emerging technologies including robots, drones, self-driving vehicles and new medical devices
22PCS1E3	Network Security & Cryptography				✓	A stable and efficient network security system is essential to protecting client data
22PCS2E1	Software Project Management	✓				Important role in an organization by giving insights into project progress, performance, and inventory tracking

22PCS2E2	Software Engineering and Testing	✓				Application of principles used in the field of engineering, which usually deals with physical systems, to the design, development, testing and deployment of software systems
22PCS2E3	Object Oriented Analysis and Design with UML	✓				Helps to visualize, specify, construct, and document the artifacts of an object-oriented system

DEPARTMENT OF COMPUTER TECHNOLOGY						
Programme: Computer Technology						Year:2021
Course Code	Course Title	Need				Rationale
		Local	National	Regional	Global	
20 UCT 517	Core XI: Open Source Technologies (PHP And MySQL)	✓		✓		The students of this Programme can be web developers would be able to write dynamic interactive web based applications using PHP and MYSQL database. After mastering this course they may work as self-employed web page developer.
20 UCT 518	Core XII: Information Security		✓		✓	The concepts needed to read through the ripe in the market place and understanding risks and how to deal with them. The student will have a Perspective on security in general and better understanding to reduce and manage the security risks.
20 UCT 5E1	Elective I - Cloud Computing			✓	✓	The course curriculum

						has been designed keeping in view the emerging trends in advanced computing as well as contemporary and futuristic human resource requirements of the IT industry.
20 UCT 5E2	Elective I – Data Mining and Warehousing			✓	✓	Exponential increase in data has led to rise in the demand for specialized data sciences. This calls for advanced sciences tools that can help in developing insights from the data.
20 UCT 6E4	Elective II - Embedded Systems			✓		Embedded system design and programming skills for different commercial and industrial applications are enhanced
20 UCT 6E7	Elective III - Multimedia Techniques		✓			
20 UCT 623	Industry Oriented Practicals				✓	Experience the project program that affords them the opportunity to match classroom learning with on the-job reality. Adapt to developments in the field and be enriched by active involvement in the field of project.

						Students are encouraged to take up projects in association with local and regional industries or carry out research projects based on issues in the immediate community
21 UCT 101	CORE - I : Programming in C				✓	In order to enable the students use the computers effectively in problem solving, this course offers the modern programming Language C along with exposition to various applications of computers. The knowledge of C language will be reinforced by the practical exercises.
21 UCT 102	CORE II: Digital Fundamentals and Computer Organization			✓		This course has been designed to make the students know about the fundamental principles of digital electronics and gain familiarity with the available IC chips and also it gives a background in the broad field of digital systems

						design and microprocessors.
21 UCT 204	CORE III: Object oriented Programming with C++				✓	Object orientation is a new approach to understand the complexities of the real world. Thiscourse offers the model programming language C++ that shall help the students toimplement the various concepts of object orientation practically.
21UCT 307	Core V: Java Programming				✓	The current industrial trends necessitate acquiring java knowledge for computer engineering and Computer technology graduates. This course develop necessary skills in students to apply object oriented programming techniques in java so that the students will be able to develop complete applications using core java.
21 UCT 308	Core VI: Database Management System		✓			This course will acquaint the student with

						knowledge of fundamentals concepts of DBMSand its application in different areas, storage, manipulation and retrieval of data using query languages
21VAC304	VAC I- IoT (Internet of Things)				✓	The course is prepared to provide the students for detailed understating of IOT for manufacture.
21UCT 412	Core VIII: Advanced Java Programming				✓	This course is designed to teach the student how to write, test, and debug advanced-level Object-Oriented programs using Java with a heavy emphasis toward network and web programming.
21UCT 413	Core IX: Linux And Shell Programming				✓	The purpose of this subject is to cover the concepts, Installation Process, Hardware Requirementsand features of Unix/Linux. Basic Commands & Shell Programming.
21UCT4N3/ 21UCT4N4	Skill Based Non-Major Elective II - Office Automation Lab /			✓		This subject covers the handling of whole field

	CorelDraw Lab					of word processing. It also involves various clericaltasks, such as organizing customer data or creating reports. It enables people with lower skill levels to perform higher-level tasks. Office Automation helps the users with a sophisticated set of commands to format, edit, and print text documents. It is used as valuable and important tools in the creation of application such as newsletters, brochures, charts, presentation, documents, drawings and other graphic images.This will make the students proficient in office automation applications. Desk Top Publishing is useful for learning how to design various publications such as banner, brochure, viz.

						cards, books and book covers, booklets, etc. This course is make the students to graphic designers, web designers, and all other work with images and designs.
21VAC404	VAC- II:PC Assembly and CCTV camera Installation	✓		✓		Assembling and testing skills in CCTV, audio and video system are enhanced to cope up with the modern consumer needs.
21UCT517	CORE XI: Open Source Technologies		✓		✓	PHP is a powerful tool for making dynamic and interactive database driven web pages. PHP is the widely-used as efficient open source technology. The students of this Programme in Computer Technology as web developers would be able to write dynamic interactive web based applications such as for online banking, ticket/hotels booking sites, ECommerce using PHP and MYSQL database.

						After mastering this course they may work as self-employed web page developer.
21UCT518	CORE XII: Information Security		✓		✓	This course has been designed by keeping in view the basic computer users and information system managers. The concepts needed to read through the ripe in the market place and understanding risks and how to deal with them. It is hoped that the student will have a wider perspective on security in general and better understanding of how to reduce and manage the security risks.
21UCT5E11	Core Elective - I :Cloud Computing				✓	The course groom the students to enable them to work on current technology scenarios as well as prepare them to keep pace with the changing face of technology and the requirements of the growing IT industry. The

						course curriculum has been designed keeping in view the emerging trends in advanced computing as well as contemporary and futuristic human resource requirements of the IT industry.
21UCT5E12	Core Elective - I : Embedded Systems			✓	✓	In the rapidly growing digital world, role of embedded systems is increasingly vital in various domains such as industrial, home automation, entertainment systems and Medical equipment. The core of all such system is powered by electronic hardware and associated with software. It is there for evident to impart the knowledge of the realted technology and hands on skills to develop and maintain electronics hardware based embedded systems.
21UCT5E13	Core Elective - I : Management	✓				This module is designed for those candidates who

	Information System					are, or will be, in a position to make or influence decisions related to the selection, design and support of management information systems (MIS).
21UCT520	LAB - VIII: Web Designing			✓		This course will enable the students to understand the basics of internet and Various applications of internet like e-mail, FTP, Telnet, Newsgroups and videoconferencing. In addition, this course develops competency amongst the students to design professional with sites and interactive web pages and manage advanced content and sites quickly and efficiently.
21UCT5AL1	Advanced Learner Course - I **:** Software Testing- Self Study(Optional)		✓			Techniques of testing software after development
21UCT5S11	Skill Based Elective - I : Python Lab				✓	This course is designed to offer the student a well-rounded

						introduction to programming in Python, including a significant amount of practical application through the completion of programming exercises, such that after completing the course, the student will have a sound understanding of the basics of programming in Python.
21UCT5S12	Skill Based Elective - I : HTML5 With CSS Lab		✓			Web development in general is to build a foundation of skills creating web pages. However, this course develops competency amongst the studentsto learn up-to-date information, e.g., HTML5 and CSS3 and design principles, e.g., proximity, alignment, contrast, and navigation design to meet current requirements in the highly competitive job market.
22 UCT 101	CORE - I : Programming in C				✓	In order to enable the students use the computers effectively in problem solving, this

						course offers the modern programming Language C along with exposition to various applications of computers.
22 UCT 102	CORE II: Digital Fundamentals and Computer Organization			✓		This course has been designed to make the students know about the fundamental principles of digital electronics and gain familiarity with the available IC chips and the broad field of digital systems design.
22UCT 204	Core V: Java Programming				✓	This course develop necessary skills in students to apply object oriented programming techniques in java so that the students will be able to develop complete applications using core java.
22UCT2A2	Allied II : Mathematics II – Operations Research	✓				Optimization techniques and to solve many practical problems in inventory control and capital budgeting problem and Queuing theory update the

						knowledge for all the three needs

Programme: M.Sc., Botany						Year: 2022 -2024
Course Code	Course Title	Need				Rationale
		Local	National	Regional	Global	
22PBY101	Plant Diversity I	✔	✔	-	-	Utilizing the algae and fungi as food, medicine, fertilizer and algae as indicators of pollution.
22PBY102	Plant Diversity II	✔	✔	-	-	Identifying the ecology and evolutionary significances of Bryophytes, Pteridophytes and Gymnosperms in environmental sustainability.
22PBY103	Core 3Applied Microbiology and Plant Pathology	✔	✔	✔	-	Knowledge about microbes. Knowledge about plant infectious microbes and their diagnostic methods
22PBY1E1	Ecology and Phytogeography	-	-	-	✔	To understand the mechanism of environmental and biodiversity management
22PBY1E2	Ethno Botany	✔	-	-	✔	To study the local herbs and their medicinal properties to treat diseases
	Seed technology	✔	✔	-	-	Awareness on storage reserves in seeds, seed longivity and seed viability to quality yield

						of crops.
22PBY207	Cytology, Genetics and Plant Breeding	-	-	-	✔	To study genes and their mode of expression Awareness on the conventional methods of plant breeding to producing new variety.
22PBY2E4	**Elective2** Horticulture and Landscaping	✔	-	-	-	To understand the principle and techniques of improving horticultural plants
22PBY2E5	IPR and Bioethics	-	✔	-	-	Fundamentals of patenting, copyright and trademark
22PBY2E6	Organic farming	✔	-	-	-	The preparation and application of organic manures locally
22PBY2N1	**Non- Major Elective 1** Plants in Tamil Culture	✔	-	-	-	To know about the – plants used in earlier literature
22PBY309	Taxonomy of Angiosperms	✔	✔	-	-	To learn the method of identifying plants to arrive at local and national flora
22PBY310	Plant Biochemistry and Biophysics	-	-	-	✔	Knowledge in the synthesis of biomolecules and their role in metabolic pathways along with their regulation.
22PBY311	Plant Biotechnology and Nanobiology	-	-	-	✔	Demonstrates the role of transgenic plants and bionano particles in the fields of medicine, agriculture and environment.

						To inculcate the techniques of plant tissue culture, so that students can get placed in plant tissue culture industries
22PBY312	**Laboratory course - III**	✔	✔	✔		Knowledge on the preparation of solutions, to carry out the experiments on biochemistry and plant tissue culture.
22PBY3E8	Herbal Technology	-	-	✔	-	To learn the medicinal value of plants and the students will study the medicinally used traditional herbs
22PBY3E9	Pharmacognosy	-	✔	-	-	To study the medicinal plants and their utilization in the preparation of herbal pharmacueticals
22PBY413	Research Methodology	-	-	-	✔	Scientific understanding of analytical techniques and detail interpretation of results.
22PBY414	Bioinformatics and Cyber Security	-	-	-	✔	Modern competences in the handling of bioinformatics tools.

		Local	**National**	**Regional**	**Global**	
19UCT517	CORE XI: Open Source Technologies		✓		✓	The students of this Programme in Computer Technology as web developers would be able to write dynamic interactive web based applications such as for online banking, ticket/hotels booking sites, ECommerce using PHP and MYSQL database. After mastering this course they may work as self-employed web page developer.
19UCT518	CORE XII: Information Security		✓		✓	To impart knowledge to the students for the preparation in view of basic computer users and information system managers and the concepts needed to read through the ripe in the market place as well as understanding risks and how to deal with them. It is hoped that the student will have a wider perspective on security.
19UCT5E1	Core Elective - I :Cloud Computing				✓	To impart knowledge to the students in grooming them to work on current technology scenarios as well as prepare them to keep pace with the changing face of technology and the requirements of the growing IT industry.
19UCT6E4	Core Elective - II : Embedded Systems			✓	✓	To impart knowledge to the students for the preparation to work in Device drivers and Interrupts servicing mechanism, inter-process communication and synchronization of processes and hands on skills to develop and maintain electronics hardware based embedded systems.

20UCT307	Core V: Java Programming				✓	To impart knowledge to the students for the preparation to develop necessary skills in students to apply object oriented programming techniques in java so that the students will be able to develop complete applications using core java.
20UCT308	Core VI: Database Management System		✓		✓	To impart knowledge to the students for the preparation to acquaint the student with knowledge of fundamentals concepts of DBMS and its application in different areas, storage, manipulation and retrieval of data using query languages.
20UCT412	Core VIII: Advanced Java Programming				✓	To impart knowledge to the students for the preparation of designed to teach the student how to write, test, and debug advanced-level Object-Oriented programs using Java with a heavy emphasis toward network and web programming.
21 UCT 101	CORE - I : Programming in C				✓	In order to enable the students use the computers effectively in problem solving, this course offers the modern programming Language C along with exposition to various applications of computers. The knowledge of C language will be reinforced by the practical exercises.
21 UCT 102	CORE II: Digital Fundamentals and Computer Organization			✓		This course has been designed to make the students know about the fundamental principles of digital electronics and gain familiarity with the available IC chips and also it gives a background in the broad field of digital systems design and microprocessors.
21 UCT 204	CORE III: Object oriented Programming with C++				✓	Object orientation is a new approach to understand the complexities of the real world. This course offers the model programming language C++ that shall help the students to implement the various concepts of object orientation practically.

Course Code	**Course Title**	**Need**				**Rationale**
		Local	**National**	**Regional**	**Global**	
20PCS312	Advanced Python Programming		✓			Evaluate and apply the functions and python libraries to analyze and solve various data analytics problems
20PCS313	Android Programming				✓	Deploy a basic application that acts as a working example with various concepts using SQLite database
20PCS314	Network Security & Cryptography		✓			Evaluate various security practice and system security
20PCS315	Programming Lab-V : Advanced Python Programming		✓			Validate how databases are integrated with components ,modular programming and the design of user interfaces
20PCS316	Programming Lab-VI: Android Programming				✓	Implement the features of Java to build Android applications and use the development tools in the Android development environment
20PCS3E1	Artificial Intelligence And Expert Systems		✓			Evaluate and design a real world problem for implementation and understand the dynamic behavior of a system

20PCS4P2	Project Work and Viva voce (Individual)				✓	opportunities for students to collaborate or drive their own learning, also teaches them skills such as problem solving, and helps to develop additional skills integral to their future

21PCS101	Design & Analysis of Algorithms		✓			Analyze major graph algorithms and to employ graphs to model engineering problems
21PCS102	Data Mining and Warehousing		✓			Analyze the techniques of clustering, classification, association finding, feature selection and visualization to real world data
21PCS103	Advanced Operating System				✓	Synchronization, communication and scheduling in parallel systems. Distributed systems, their communication mechanisms, distributed objects and middleware.

21PCS104	Advanced Database Management System		✓			Develop a database application system as part of a team
21PCS105	Programming Lab I: Design & Analysis of Algorithms	✓				Prove appropriate data structure is applied to specified problem definition
21PCS1E1	Advanced Networks				✓	Analyze the problems and solutions associated with delivery and forwarding of packets
21PCS206	Android Programming				✓	Deploy a basic application that acts as a working example with various concepts using SQLite database
21PCS207	Cloud Computing				✓	Present the broad perceptive of cloud architecture and model
21PCS208	Big Data Analytics				✓	Big data analytics helps organizations harness their data and use it to identify new opportunities
21PCS209	Advanced Java Programming				✓	Validate server side java programs using Servlets and JSP
21PCS210	Programming Lab II: Android Programming				✓	Deploy a basic application that acts as a working example with various concepts using SQLite database
21PCS2E3	Object Oriented Analysis and Design with UML	✓				ML can be described as the successor of object-oriented (OO) analysis and design. An object contains both data and methods that control the data.

21PCS2P1	Pilot Project – I				✓	Develop entire new software system or to enhance/modify functionalities of existing software or to provide customization based on existing technology/framework to fulfill specific requirements.

19UCS517	Core XI: Linux		✓			Linux kernel and application programs supports their installation on any kind of hardware platform.
19UCS518	Core XII: Kotlin Programming				✓	Kotlin is a proven technology for building cross-platform mobile applications and being the official language for Android development.
19UCS519	Core XIII: Cyber Security		✓			Cyber security is important because it protects all categories of data from theft and damage.
19UCS5E1/ 19UCS5E2/ 19UCS5E3	Core Elective-I: Software Testing Distributed Computing Client/Server Technology		✓			determine how the different types of testing should be performed by identifying areas of the system where those aspects were considered during development. Distributed computing can allow an application on one machine to leverage processing power, memory, or storage on another machine.

						The client-server approach enables any general-purpose computer to expand its capabilities by utilizing the shared resources of other hosts.
19UCS520	Core Lab VII: Linux Lab				✓	Linux kernel and application programs supports their installation on any kind of hardware platform.
19UCS521	Core Lab VIII: Programming lab using Kotlin		✓			Kotlin is a proven technology for building cross-platform mobile applications and being the official language for Android development.
19UCS622	Core XIV: Python Programming		✓			it has simplified syntax and not complicated, which gives more emphasis on natural language.
19UCS6E4 19UCS6E5 19UCS6E6	Core Elective – II: Data mining and Warehousing Big data Analytics Grid and Cloud Computing				✓	the process of finding anomalies, patterns and correlations within large data sets to predict outcomes. helps organizations harness their data and use it to identify new opportunities. Grid computing is a group of networked computers which work together as a virtual supercomputer to perform large tasks, such as analysing huge sets of data or weather modeling.
19UCS6E7 19UCS6E8	Core Elective – III: E-Commerce		✓			**help companies in many ways to improve their business**. The Internet allows a company to lower cost

19UCS6E9	Enterprise Resource Planning Management Information System					dramatically across the supply chain, add additional dimensions to customer service. used by organizations looking to manage their business functions within a centralized and integrated system. MIS, collects data from many different sources and then processes and organizes that data to help businesses make decisions.
19UCS623	Core Lab IX: Python Programming Lab		✓			it has simplified syntax and not complicated, which gives more emphasis on natural language.
19UCS624	Core Lab X: Advanced Applications in MS Excel Lab				✓	Excel allows employees to deal and do calculations and this speeds up productivity.
19UCS625	Project				✓	a statement of facts explaining the background of the project.

19 UBP 513	Cost Accounting	✓	✓	✓		To enlighten the student's on the importance of cost ascertainment**.** Reduction and control.
19 UBP 514	Income Tax	✓	✓	✓		To facilitate the students to gain adequate knowledge in Income-Tax
19 UBP 515	Capital Market For Business Process Services		✓	✓		To enable the students to acquire indepth knowledge in the field of finance in investment alternatives, introduce them to framework of their analysis and role of investor protection.
19 UBP 516	Managing Business Processes –I	✓	✓	✓		To provide an understanding of BPS process and techniques.
19 UBP5E1	Company Law and Secretarial Practice		✓	✓		To provide the student with basic knowledge and understanding the law relating the provisions of the Companies Act, 2013 and

						Secretarial Practice.
19 UBP 517	Institutional Training	✓				Training will develop intermediate to advanced knowledge and skills in the business. To develop the capability of human resource –personnel and to prepare functional analysis map for the job functions.
19 UBP5S1	Human Resources Capital Management	✓	✓			To expose the students to the human resources management and its practices. To impart knowledge on recruitment process.
19 UBP 618	Management Accounting	✓	✓	✓		To enlighten the students on the different concepts of management accounting
19 UBP 619	E-Commerce & Information Security		✓	✓		To enable the students to acquire knowledge on electronic commerce and online business transactions.
19 UBP 620	Managing Business Processes – II		✓	✓		To provide an understanding of featured BPS Techniques.
19 UBP 621	Programming Lab In Tally	✓	✓			This course is aimed at developing software skills among the students, so that the students can handle this software after their studies. This course deals with the fundamentals of Tally ERP 9.
19 UBP 6E3	Case Analysis	✓	✓			To enable the student to develop their analytical skills, evaluating new and current knowledge, problem solving abilities and decision making strategies.
19 UBP 6E5	Indirect Taxation	✓	✓			To impart basic knowledge about major Indirect Taxes.
20 UBP 305	Corporate	✓	✓			To inculcate knowledge among the students

	Accounting					about corporate accounting and its implication
20 UBP 306	Commercial Law	✓	✓	✓		To make the students to understand the fundamentals of Commercial Laws**.**
20 UBP 307	Insurance For Business Process Services	✓	✓	✓		To impart the knowledge of insurances and related processes. To give exposure to the students about the client specific insurance solutions.
20 UBP 308	Supply Chain Management for Business Process Service		✓	✓		To understanding the important role of supply chain management in today's business environment
20 UBP 3A4	Business Economics	✓	✓			The course is designed for students to examine the importance and application of economic analysis to business decision making. Topics include economic theories and applications dealing with demand, production, market and pricing.
20UBP 3N1	Entrepreneurial Development	✓	✓			To Understand the Basic Development of Entrepreneurship as a Profession
20 UBP 409	Higher Corporate Accounting	✓	✓			To enable the students understand Higher Corporate Accounting System
20 UBP 410	Campus to Corporate Transition	✓	✓			To exposed the students to the concepts of corporate world. They will have practical ways to implement the concepts, immediately on their return to their respective work front.
20 UBP 411	Banking For Business Process Services	✓	✓			To provide ideas related to usage of banking functions and its activities
20 UBP 412	Retail Environment & Market Research		✓	✓		To enable the students with the knowledge aspect of marketing concepts and research in management of retail practices.

20 UBP 4A5	Statistics Methods		✓	✓		Show proficiency in basic statistical skills embedded in their courses. Students shall know how to organize, manage and present data.
20UBP4N3	Project Management		✓	✓		To demonstrate effective leadership and manage the selection and initiation of individual projects.
21 UBP 101	Financial Accounting	✓	✓	✓		To impart knowledge to the students for the preparation of various accounting statements
21 UBP 102	Business Management		✓	✓		This course introduces students to the basic principles of management in modern business. Among the topics discussed are environmental factors affecting decision-making, planning organizing, motivating and controlling organizational resources.
21 UBP 1A1	Business Mathematics		✓	✓		The mathematics program promotes mathematical skills and knowledge for their intrinsic, effectiveness in developing proficiency in analytical reasoning. To develop the analytical and logical thinking.
21 UBP 203	Higher Financial Accounting		✓	✓		To familiarize the fundamental concepts of higher financial Accounting.
21 UBP 204	Finance And Accounting For Business Process Services	✓	✓			To enable students to learn the principles Accounting and practical Procedures applied Business Process Outsourcing.
21 UBP 2A2	Programming Language – Business Application Software And Internet	✓	✓	✓		To enable the student and to develop the software skill in business.

18UCT517	CORE XI: OPEN SOURCE TECHNOLOGIES		✓		✓	The students of this Programme in Computer Technology as web developers would be able to write dynamic interactive web based applications such as for online banking, ticket/hotels booking sites, ECommerce using PHP and MYSQL database. After mastering this course they may work as self-employed web page developer.
18UCT518	CORE XII: Information Security		✓		✓	To impart knowledge to the students for the preparation in view of basic computer users and information system managers and the concepts needed to read through the ripe in the market place as well as understanding risks and how to deal with them. It is hoped that the student will have a wider perspective on security .
18 UCT 519	Core Elective - I :Cloud Computing				✓	To impart knowledge to the students in grooming them to work on current technology scenarios as

Course Code	**Title of the Course**	**Need(s)**				**Rationale**
		Local	**Regional**	**National**	**Global**	
20UIT101	Programming in 'C'			✓		To know well about the basic programming concepts
20UIT102	Computer System Architecture	✓				To meet the requirements of appearing National Eligible Test (NET) and SET
20UIT103	Lab. I - Programming in 'C'			✓		To know well about the basic programming skills
20UIT1A1	Mathematics – I (Statistics))	✓		✓		To build the mathematical skills for programming
20UIT204	Object Oriented Programming with Java			✓		To design and program stand-alone Java applications.
20UIT205	Data Structures				✓	To solve problems using data structures and writing programs
20UIT206	Lab. II - Programming in Java			✓		To design and program stand-alone Java applications.

20UIT2A2	Mathematics – II (Discrete Mathematics)		✓			To build the mathematical skills for programming
19UIT307	Operating Systems		✓			To make the computer system convenient to use in an efficient manner
19UIT308	Relational Database Management System			✓		To have a broad understanding of database concepts and database management system software.
19UIT309	Service Oriented Architecture	✓	✓	✓		To learn about network connectivity models.
19UIT310	CC Lab. III RDBMS			✓		To know well about the basics of Database programming.
19UIT311	Lab. IV Web Designing (HTML,CSS, JavaScript & Angular)	✓				To get better knowledge to build a website.
19UIT3A3	GE III – ALLIED III: Microprocessor and Assembly Language Programming			✓		To meet the requirements of appearing National Eligible Test (NET) and SET
19UIT3N1	Skill Based Non-Major- I (Social Networks)	✓		✓	✓	To prepare students for evaluating the best social media platform(s) for their business
19UIT3N2	Skill Based Non-Major- I (Hardware &Networking)	✓		✓	✓	To understand and Identify the existing configuration of the computers & peripherals.
19UIT412	Data Communication and Networks				✓	To meet the requirements of appearing National Eligible

						Test (NET) and SET
19UIT413	Advanced Java Programming	✓		✓		To learn test, and debug advanced-level Object-Oriented rogram using Java
19UIT414	Visual Programming	✓		✓		To learn concept of front-end designing of an application.
19UIT414	Lab. V – Programming in Advanced Java			✓		To learn test, and debug advanced-level Object-Oriented Progra m using Java
19UIT416	Lab. VI - Visual Programming	✓		✓		To learn components of front-end designing of an application.
22UIT4A4	Software Engineering	✓	✓	✓	✓	This broad education is necessary to understand the High impact of software Engineering solutions in local and global, economic, environmental, and societal context
19UIT4N3	Skill Based Non-Major- II (Data Analytics)				✓	To Apply principles of Data Science to the analysis of business problems.
19UIT4N4	Skill Based Non-Major- II (Computer Security)			✓	✓	To prepare students with the technical knowledge and skills needed to protect and

						defend computer systems and networks.
18UIT518	Information Security				✓	To enhance the security of various components using algorithms globally
18UIT517	Open Source Methodologies			✓		To know about design and working principles of open Source software.
18UIT519	CloudComputing		✓	✓	✓	To enhance the effectiveness of various businesses usingcloudstorage globally
18UIT519	Data Mining and Analytics				✓	Different types of organizations use the technology to harness the data and extract value from it.
18UIT519	Embedded System				✓	To learn the basic concept of embedding techniques.
18UIT520	Lab.VII-OpenSource Methodologies			✓		To give practical knowledge on commands and editors available in linux platform.
						Improves ability to usethetechniques, skills,andtorapidly learn and apply emerging software testing technologies

18UIT521	Lab.VIII-Software Testing Tools			✓		necessary for SW development and usage.
18UIT5S1	Skill Based Major Elective - Lab. I Web Programming (PHP)	✓	✓			To get better knowledge to build a website.
18UIT5S2	Skill Based Major Elective - Lab. I Web Programming Lab.(JSP)	✓	✓			To get better knowledge to build a website and back end connectivity.
18UIT622	Computer Graphics		✓		✓	To motivate Students about the Computer Graphics field because they want t o understand how to build fascinating applications like Online games.
18UIT623	Digital Image Processing		✓		✓	To learn about various compression and segmentation techniques.
18UIT623	Software Project Management		✓		✓	To learn about various stages of software development

18UIT623	Artificial Intelligence		✓	✓	✓	Learningand analyzing the Artificial Intelligence techniques and conceptshelpsin solvingrealworld problems
18UIT624	E-Commerce	✓	✓	✓	✓	Utilizing this powerful E-commerce tools wiselyhasbecome eminently important for business-to-business (B2B) companies
18UIT624	Mobile Computing	✓		✓		To enable the Students to learn mobile techniques such as 2G, 3G, 4G & 5G
18UIT624	Multimedia Techniques	✓	✓		✓	To learn about animation using various tools.
18UIT625	Lab. IX - Graphics & Multimedia	✓	✓		✓	To learn about 2D & 3D graphics using various tools
18UIT626	Project					To give practical knowledge on courses studied throughout and used to develop software.

18UIT6S3	Skill Based Major Elective - Lab. I Web Programming (Java script)	✓	✓			To get better knowledge to build a website and to learn about back end connectivity.
18UIT6S4	Skill Based Major Elective - Lab. I Web Programming (ASP)	✓	✓			To get better knowledge to build a website.

		Local	National	Regional	Global	
20UCS101	Core I: Programming in C				✓	To keep in mind the fundamentals of C programming
20UCS102	Core II: Digital Computer fundamentals and organization				✓	To recollect the fundamental concepts and techniques used in digital electronics.
20UCS1A1	Allied-1: Mathematics-I		✓			To recollect the definition of matrix and determinants and perform various operations on it
20UCS103	Core Lab I: Programming Lab in C		✓			To implement different operations on arrays and use functions to solve the given problems.
20UCS204	Core III: Object Oriented Programming Using C++	✓				To remember the basic OOPs concepts such as Class, Inheritance, Abstraction, Polymorphism etc.
20UCS205	Core IV: Data and File Structure		✓			To keep in mind the basic static and dynamic data structures and relevant standard algorithms for them

20UCS2A2	Allied -2: Mathematics-II (Discrete Mathematics)			✓		To keep in mind about the fundamental ideas and notation of discrete mathematics with examples
20UCS206	Core Lab II: Programming Lab in C++			✓		To apply the basic concepts of C++ such as function, friend functions and array of objects to solve a particular problem.
19UCS307	Core V: Java Programming		✓			To remember the OOPs concepts such as class, methods, inheritance, encapsulation and polymorphism etc
19UCS308	Core VI: Relational Database Management System and Oracle				✓	To remember the basic concepts and applications of database systems and SQL.
19UCS309	Core VII: Operating System	✓				To understand the concepts of Storage Allocation, Process Management, and Scheduling Algorithms
19UCS3A3	Allied -3 : Computer Based Optimization Techniques			✓		To remember the Linear Programming Problem concepts such as Mathematical formulations, Graphical Method, Two-phase problem, etc.
19UCS310	Core Lab III: Programming Lab in Java		✓			To apply the basic concepts of Java such as class, methods, constructors, arrays and interfaces to solve the

						problems.
19UCS311	Core Lab IV: Programming Lab in RDBMS				✓	To apply the normalization techniques for development of application software to realistic problems and ability to formulate queries using SQL DML/DDL/DCL commands
19UCS412	Core VIII: . NET Programming	✓				To remember the OOPs concepts such as class, objects, methods, Inheritance etc.
19UCS413	Core IX: Data Communication and Computer Networks		✓			To remember the basic concepts Networks
19UCS414	Core X: Software Engineering			✓		To recollect basic software quality assurance practices to ensure that software designs, development, and maintenance meet or exceed applicable standards.
19UCS415	Core Lab V: . NET Programming Lab				✓	To get the idea of developing application projects using ADO.NET
19UCS416	Core Lab VI: Multimedia Lab	✓				To apply the different type of tools available in Photoshop to create simple applications.

18UCS517	Core XI: Linux				✓	To remember the operating system architecture and low level interfaces that are required to build Linux systems
18UCS518	Core XII: Kotlin Programming	✓				To get an idea about classes, objects, properties, fields and interfaces of kotlin.
18UCS519	Core XIII: Cyber Security		✓			Assess cyber security risk management policies in order to adequately protect an organization's critical information and assets.
18UCS520	Core Lab VII: Linux Lab			✓		To evaluate the basic set of commands and utilities in Linux systems.
18UCS521	Core Lab VIII: programming Lab using Kotlin				✓	To Design and develop user Interfaces for the Android platform.
18UCS5E1	Software Testing	✓				To remember the software development life cycle phases,quality assurance and quality control.
18UCS5E2	Distributed Computing		✓			To remember the basic elements and concepts related to distributed system technologies;
18UCS5E3	Client/Server Technology			✓		To Understand the components used for client-server development.
18UCS622	Core XIV: Python				✓	Core XIV: Python Programming

	Programming					
18UCS623	Core Lab IX: Python Programming Lab	✓				
18UCS624	Core Lab X: Advanced Applications in MS Excel Lab		✓			
18UCS6E4	Data mining and Warehousing			✓		Develop skill in selecting the appropriate data mining algorithm for solving practical problems
18UCS6E5	Enterprise Resource Planning		✓			To remember the knowledge of typical ERP systems, and the advantages and limitations of implementing ERP systems.
18UCS6E6	Grid and Cloud Computing				✓	To review the applications of various cloud services development tools such as Amazon Ec2, Google App Engine and IBM clouds.
18UCS6E7	Multimedia Packages	✓				To understand the user requirements and project development techniques using audio, video and text.
18UCS6E8	Big data Analytics		✓			To understand the concept and challenge of big data and why existing technology is inadequate to analyze the big data

18UCS6E9	Android Programming			✓		To get an idea of the UI - components, event handling, and screen orientation, various controls, fragments and examples.

UG DEPARTMENT OF COMPUTER PPLICATIONS						
Programme: BCA						Year: 2020
Course Code	Course Title	Need				Rationale
		Local	National	Regional	Global	
20UBC101	Core - I : Programming In C				✓	It is used in Embedded systems for developing desktop applications.
20UBC102	Core – II : Digital Computer Fundamentals	✓	✓			To meet the requirements to appear for NET& SET.
20UBC1A1	Allied - I :Mathematics I - Computer Oriented Numerical And Statistical Methods	✓		✓		Gain an experience in the implementation of numerical methods using a computer.
20UBC103	Core Lab -I : Programming In C				✓	It constitutes easier time solving problems.
20UBC204	Core - III : Object Oriented Programming With C++				✓	Powerful General Purpose Programming Language used to develop OS, Browsers, games and so on.
20UBC205	Core - IV : Data Structures			✓	✓	Key Component of Computer Science, back functionality in Internet Browser, largely used in Artificial Intelligence
20UBC2A2	Allied - II : Mathematics II –Mathematical Foundations Of Computer Applications	✓	✓			Tool for improving reasoning and problem-solving capabilities
20UBC206	Core Lab - II : Programming In C++				✓	Helps to create computer applications that can be used to solve real world problems

20EVS201	Environmental Studies				✓	To acquire the knowledge of environmental issues and enrich them to take responsible decisions
19UBC307	Core - V :Relational Database Management System And Oracle				✓	It is possible to store complex business models in a relational database.
19UBC308	Core - VI :Operating Systems				✓	It allows communicating with the computer without knowing how to speak the computer's language.
19UBC309	Core - VII :Organizational Behaviour	✓	✓	✓		It helps to understand one's own behaviors, attitudes, ethical views, and performance.
19UBC3A3	Allied - III :Accountancy For Decision Making		✓			To know financial transactions of a business.
19UBC310	Core Lab - III : Relational Database Management System And Oracle				✓	Gains Practical experience for data storage in order to perform complex business applications.
19UBC311	Core Lab - IV : OS Commands and Shell Script Programming				✓	Provides Problem-Oriented Learning.
19UBC312	Core Lab - V : DTP Programming	✓				It is used to create documents like leaflets, brochures and newsletters.
19UBC3N1	Non Major Elective - I : Web Designing Lab				✓	1) Can learn in a short period of time. 2) Need limited skills. 3) Freelancing projects can be done.
19UBC3N2	Non Major Elective - I : Desktop Publishing Lab	✓				It is used to create documents like leaflets, brochures and newsletters.
19UBC413	Core - VIII :Web Development				✓	Web technology concepts are required for developing web applications

19UBC414	Core - IX :Computer System Architecture		✓	✓		To enhance the knowledge of designing, building and operating the Computers and knowing what is inside and how it works.
19UBC415	Core - X :Software Engineering		✓	✓		To gain the knowledge to solve the software and system challenges with a comprehensive set of skills
19UBC4A4	Allied - IV :Mathematics III - Computer Based Optimization Techniques			✓		By doing quantitative methods and techniques for effective decision making, model formulation and applications, it helps the students to equip them to solve business/job decision problems.
19UBC416	Core Lab - VI: Web Development				✓	Reliable, fast, easy and open source framework to develop dynamic, rich web sites and web applications
19UBC417	Core Lab - VII : PHP Programming				✓	Extensively used for building web applications, web sides, cloud computing and machine learning also.
19UBC418	Core Lab - VIII: Scripting & HTML				✓	Designing a web site is most essential in every sector which reflects in better business and revenue
19UBC4N3	Non Major Elective - II : Open Source Software Lab	✓				To understand the expectations of industry and to improve employability skills
19UBC4N4	Non Major Elective – II: 2-D Animation Lab	✓				Every promotion in industry is closely related to animation. Due to its extensive and ever expanding field, animators are highly demanded persons
18UBC519	Object Oriented Programming using Java Language				✓	It is primarily used for Internet-based applications.

18UBC520	Software Testing		✓			It provides the opportunity and knowledge for a client to develop and strengthen the necessary skills to gain, maintain, and advance in a chosen area
18UBC521	Elective - I Networks				✓	Interconnects the people and companies across the world.
18UBC521	Elective - I Grid Computing			✓		It provides Collaborative computing support.
18UBC522	Elective –II: Organizational Behaviour	✓	✓	✓		It helps to understand one's own behaviors, attitudes, ethical views, and performance.
18UBC522	Elective –II: Current Trends And Technologies				✓	To determine what is currently accepted to be the best and to take a constructivist approach to develop a leadership vision for implications of past, current and future developments in Technology
18UBC523	Programming Lab - IX: Java Programming				✓	It is used for creating internet based applications.
18UBC524	Programming Lab - X : Software Testing				✓	To identify any errors, gaps or missing requirement versus the actual requirement.
ADD-ON COURSE	Mini Project	✓				Project allows the students to study, do research and act by themselves using their abilities, interests, personal experience and aptitudes.
18UBC5S1	Skill Based Elective – I Software Analysis and Design	✓	✓	✓	✓	To gain the knowledge to solve the software and system challenges with a comprehensive set of skills
18UBC5S2	Skill Based Elective – I E-Commerce	✓	✓	✓	✓	To know about commercial terms, organizations and websites
18UBC5S3	Skill Based Elective – I Aptitude	✓	✓	✓	✓	It is used to train the students to get ready for their future and write competitive exams
18UBC625	Advanced Java Programming				✓	Faster growing, easily written and executed much faster than other programming language, highly demand for job

18UBC626	Elective – III: Data Mining And Warehousing				✓	Very popular to analyze and explore the data in many different sectors of business
18UBC626	Elective – III: Cloud Computing				✓	Future of computing is cloud based computing, More user friendly and affordable
18UBC627	Information Security				✓	Everything is online and information security is more important, exciting job opportunities
18UBC628	Mobile Application Development		✓	✓		Hiring more mobile app developers by the enterprises are increased day by day
18UBC629	Programming Lab - XI : Advanced Java Programming				✓	Faster growing, easily written and executed much faster than other programming language
18UBC630	Programming Lab - XII : Mobile Application Development				✓	Hiring more mobile app developers by the enterprises are increased day by day
18UBC6S4	Skill Based Elective - II: Software Industry Domains		✓			Essential to learn about the operations of the Corporate industry and prepare themselves to meet their requirement.
18UBC6S5	Skill Based Elective - II: Multimedia And Animation	✓				Every promotion in industry is closely related to animation. Due to its extensive and ever expanding field, animators are highly demanded persons
18UBC6S6	Skill Based Elective - II: Soft Skills				✓	Mandatory for everyone to sustain and survive in the field

List of Courses having focus on local, national, regionaland global developmental needs offered by the M.Sc Computer Science

PG COMPUTER SCIENCE						
Programme: M.Sc Computer Science						Year: 2020
Course Code	Course Title	Need				Rationale
		Local	National	Regional	Global	
19PCS313	AngularJS				✓	Onsuccessful completion of this course, students will be able to create dynamic web applications that depend on the Model-View-Controller architecture, and also to minimize the dependence on JavaScript requirement for functionalizing the web applications.
19PCS314	Digital Image Processing			✓		Onsuccessful completion of the course the students should understand the features of Java and the Web services.
19PCS315	Internet of Things			✓		the fundamentals of Internet of Things, IoT Protocols, built a small low cost embedded system using Raspberry Pi and to apply the concept of Internet of Things in the real worldscenario
19PCS316	Programming Lab-VI: AngularJS				✓	The knowledge about the Angular JSframework and also to apply its various concepts in real-time web application development
19PCS317	Programming Lab-VII:Digital Image Processing using MATLAB			✓		Onsuccessful completion of the course the students should understand the features of Java and theWeb services.

19PCS3E1	Elective-II-Artificial Intelligence and Expert Systems	✓				Plays a key role in today's communications, and new forms of it will become central to emerging technologies including robots, drones, self-driving vehicles and new medical devices
19PCS418	Project Work and Viva-voce (Individual)				✓	Students are required to development software system or to enhance/modify functionalities of existing software or to provide customization based on existing technology/framework to fulfill specific requirements
20PCS101	Design & Analysis of Algorithms				✓	Important role in an organization by giving insights into project progress, performance, and inventory tracking
20PCS102	Internet of Things			✓		IoT Protocols, built a small low cost embedded system using Raspberry Pi and to apply the concept of Internet of Things in the real world scenario
20PCS103	Advanced Database Management System				✓	The students are able to understand the concepts and terminology related to DBMS and various Databases.
20PCS104	Data Mining and Warehousing				✓	The students can understand the concept of data mining, classification and clustering techniques, Association rules and data warehousing
20PCS105	Programming Lab - I: Design & Analysis of Algorithms&Advanced DBMS				✓	The students can understand the concepts of various data structures and advanced database concepts.
20PCS106	Programming			✓		The fundamentals of

	Lab –II: Internet of Things					Internet of Things, IoT Protocols, built a small low cost embedded system using Raspberry Pi and to apply the concept of Internet of Things in the real worldscenario
20PCS207	Advanced Java Programming				✓	Java based applications and hands on practices by applying these advanced concepts to implement in web based applications
20PCS208	Advanced Networks			✓		The students should gain in-depth knowledge of Internet protocols and their functionalities.
20PCS209	Cloud and Big Data Analytics				✓	The students will understand the concept of Virtualization and design of cloud Services and will be able to analyze the big data using intelligent techniques.
20PCS210	Programming Lab -III : Advanced Java Programming				✓	The students should understand the advanced Java concepts such as Swing, Servlets, Web Services, Beans, RMI and JSP
20PCS211	Programming Lab-IV : Networks			✓		The system and network administration, computer and network security, operating systems, web programming, databases, and project management.
20PCS212	Pilot Project – I				✓	Students are required to develop entire new software system or toenhance/modify functionalities of existing software or to provide customization based onexisting technology/framework to fulfill specific requirements.

20PCS2E1	Elective – I: Software Agents			✓		The students should be able to understand the agent programming paradigms and to develop agents for intelligent and mobile applications using Java.
20PCS2N1/ 20PCS2N2	Non Major Elective: Multimedia Packages Lab /Web Designing Lab				✓	The objective of this course is to enable the students to develop and design various applications using Web Technology.

c) Local, Global and Regional needs format

Information Technology						
Programme: B.Sc. Information Technology		**Year 2019 - 2020**				
Course Code	**Title of the Course**	**Need(s)**				**Rationale**
		Local	**Regional**	**National**	**Global**	
19UIT101	Programming in 'C'			✓		To know well about the basic programming concepts
19UIT102	Computer System Architecture	✓				To meet the requirements of appearing National Eligible Test (NET) and SET
19UIT103	Lab. I - Programming in 'C'			✓		To know well about the basic programming skills
19UIT1A1	Mathematics – I (Statistics))	✓		✓		To build the mathematical skills for programming
19UIT204	Object Oriented Programming with Java			✓		To design and program stand-alone Java applications.
19UIT205	Data Structures				✓	To solve problems using data structures and writing programs
19UIT206	Lab. II - Programming in Java			✓		To design and program stand-alone Java applications.

19UIT2A2	Mathematics – II (Discrete Mathematics)		✓			To build the mathematical skills for programming
18UIT307	Operating Systems		✓			To make the computer system convenient to use in an efficient manner
18UIT308	Relational Database Management System			✓		To have a broad understanding of database concepts and database management system software.
18UIT309	Client/Server Computing	✓	✓	✓		To learn about network connectivity models.
18UIT310	Lab. III - RDBMS & Java (Front End)			✓		To know well about the basics of Database programming.
18UIT311	Lab. IV - HTML & DHTML (Self Study)	✓				To get better knowledge to build a website.
18UIT3A3	GE III – ALLIED III: Microprocessor and Assembly Language Programming			✓		To meet the requirements of appearing National Eligible Test (NET) and SET
18UIT3N1	Skill Based Non-Major- I (computer fundamentals)	✓		✓	✓	To prepare students for evaluating the computer fundamentals.
18UIT3N2	Skill Based Non-Major- I (Internet Basics)	✓		✓	✓	To understand and Identify the existing configuration of the Internet & peripherals.
18UIT412	Computer Networks				✓	To meet the requirements of appearing National Eligible Test (NET) and

						SET
18UIT413	Advanced Java Programming	✓		✓		To learn test, and debug advanced-level Object-Oriented rogram using Java
18UIT414	C#.Net Programming	✓		✓		To learn concept of front-end designing of an application.
18UIT415	Lab. V – Programming in Advanced Java			✓		To learn test, and debug advanced-level Object-Oriented Progra m using Java
18UIT416	Lab. VI - C#.Net Programming	✓		✓		To learn components of front-end designing of an application.
18UIT4A4	Software Engineering	✓	✓	✓	✓	This broad education is necessary to understand the High impact of software Engineering solutions in local and global, economic, environmental, and societal context
19UIT4N3	Skill Based Non-Major- II (Information Security)				✓	To Apply principles of security to computer.
19UIT4N4	Skill Based Non-Major- II (Hardware &Networking)			✓	✓	To understand and Identify the existing configuration of the computer & peripherals

18UIT518	Information Security				✓	To enhance the security of various components using algorithms globally
17UIT517	Open Source Methodologies			✓		To know about design and working principles of open Source software.
17UIT519	Mobile Computing	✓		✓		To enable the Students to learn mobile techniques such as 2G, 3G, 4G & 5G
17UIT519	Cryptography & Network Security					
17UIT519	Data Mining and Analytics				✓	Different types of organizations use the technology to harness the data and extract value from it.
17UIT519	Embedded System				✓	To learn the basic concept of embedding techniques.
17UIT520	Lab.VII-Open Source Methodologies			✓		To give practical knowledge on commands and editors available in linux platform.
						Improves ability to usethetechniques, skills,andtorapidly learn and apply emerging software

17UIT521	Lab.VIII-Software Testing Tools			✓		testing technologies necessary for SW development and usage.
17UIT5S1	Skill Based Major Elective - Lab. I Web Programming (PHP)	✓	✓			To get better knowledge to build a website.
17UIT5S2	Skill Based Major Elective - Lab. I Web Programming Lab.(JSP)	✓	✓			To get better knowledge to build a website and back end connectivity.
17UIT622	Computer Graphics		✓		✓	To motivate Students about the Computer Graphics field because they want t o understand how to build fascinating applications like Online games.
17UIT623	Cloud Computing		✓	✓	✓	To enhance the effectiveness of various businesses usingcloudstorage globally
17UIT623	Digital Image Processing		✓		✓	To learn about various compression and segmentation techniques.

17UIT623	Software Project Management		✓		✓	To learn about various stages of software development
17UIT624	Artificial Intelligence		✓	✓	✓	Learning and analyzing the Artificial Intelligence techniques and concepts helps in solving real world problems
17UIT624	E-Commerce	✓	✓	✓	✓	Utilizing this powerful E-commerce tools wisely has become eminently important for business-to-business (B2B) companies
17UIT624	Multimedia Techniques	✓	✓		✓	To learn about animation using various tools.
17UIT625	Lab. IX - Graphics & Multimedia	✓	✓		✓	To learn about 2D & 3D graphics using various tools
17UIT626	Project					To give practical knowledge on courses studied throughout and used to develop software.

17UIT6S3	Skill Based Major Elective - Lab. I Web Programming (Java script)	✓	✓			To get better knowledge to build a website and to learn about back end connectivity.
17UIT6S4	Skill Based Major Elective - Lab. I Web Programming (ASP)	✓	✓			To get better knowledge to build a website.

List of Courses having focus on local, national, regional and global developmental needs offered by the Department of Computer Technology

DEPARTMENT OF COMPUTER TECHNOLOGY						
Programme: Computer Technology						Year:2019-2020
Course Code	Course Title	Need				Rationale
		Local	National	Regional	Global	
19 UCT 101	CORE - I : Programming in C				✓	To impart knowledge to the students for the preparation of various problem solving, this course offers the modern programming Language C along with exposition to various applications of computers.
19 UCT 102	**CORE II: DIGITAL FUNDAMENTALS AND COMPUTER ORGANIZATION**			✓		To impart knowledge to the students for the preparation to know about fundamental principles of digital electronics and gain familiarity with the available IC chips and also it gives a background in the broad field of digital systems.
18 UCT 307	Core V: Java Programming				✓	To impart knowledge to the students for the preparation to develop necessary skills in students to apply object oriented programming techniques in java so that

						the students will be able to develop complete applications using core java.
18 UCT 308	Core VI: Relational Database Management System & Oracle		✓		✓	To impart knowledge to the students for the preparation to acquaint the student with knowledge of fundamentals concepts of DBMS and its application in different areas, storage, manipulation and retrieval of data using query languages.
18UCT412	Core VIII: Advanced Java Programming				✓	To impart knowledge to the students for the preparation of designed to teach the student how to write, test, and debug advanced-level Object-Oriented programs using Java with a heavy emphasis toward network and web programming.
18UCT4N3/ 18UCT4N4	Skill Based Non-Major Elective II - Office Automation Lab / CorelDraw Lab			✓		This subject covers the handling of whole field of word processing. It also involves various

						clericaltasks, such as organizing customer data or creating reports. It enables people with lower skill levels to perform higher-level tasks. Office Automation helps the users with a sophisticated set of commands to format, edit, and print text documents. It is used as valuable and important tools in the creation of application such as newsletters, brochures, charts, presentation, documents, drawings and other graphic images.This will make the students proficient in office automation applications.
18UCT517	CORE XI: Open Source Technologies		✓		✓	The students of this Programme in Computer Technology as web developers would be able to write dynamic interactive web based applications such as for online

						banking, ticket/hotels booking sites, ECommerce using PHP and MYSQL database. After mastering this course they may work as self-employed web page developer.
17UCT623	CORE XII: Information & Cyber Security		✓		✓	To impart knowledge to the students for the preparation in view of basic computer users and information system managers and the concepts needed to read through the ripe in the market place as well as understanding risks and how to deal with them. It is hoped that the student will have a wider perspective on security .
17 UCT 520	Core Elective - I :Cloud Computing				✓	To impart knowledge to the students in grooming them to work on current technology scenarios as well as prepare them to keep pace with the changing face of technology and the requirements of the

						growing IT industry.
17UCT624	Core Elective - II : Embedded Systems			✓	✓	To impart knowledge to the students for the preparation to work in Device drivers and Interrupts servicing mechanism, inter-process communication and synchronization of processes and hands on skills to develop and maintain electronics hardware based embedded systems.

						organizing, processing, retrieving and storing data and files
19UCS2A2	Allied -2: Mathematics-II (Discrete Mathematics)		✓			Useful in studying and describing objects and problems in branches of computer science, such as computer algorithms, programming languages, cryptography, automated theorem proving, and software development
19UCS206	Core Lab II: Programming Lab in C++ and Data Structures				✓	Useful for developing the operating systems or drivers that interface with hardware and embedded systems
18UCS307	Core V: Java Programming				✓	Used to develop desktop and mobile applications, big data processing, embedded systems, and so on
18UCS308	Core VI: Relational Database Management System and Oracle				✓	Provides an interface between users and applications and the database, as well as administrative functions for managing data storage, access,

						and performance
18UCS309	Core VII: Operating System				✓	Manages computer hardware, software resources, and provides common services for computer programs
18UCS3A3	Allied -3 : Computer Based Optimization Techniques		✓			A Powerful approach to decision making by achieving more complete datasets, consider all available options, predict all possible outcomes and estimate risk
18UCS310	Core Lab III: Programming Lab in Java				✓	General-purpose programming language that follows the object-oriented programming paradigm and the Write Once Run Anywhere approach
18UCS311	Core Lab IV: Programming Lab in RDBMS				✓	Provides the users with the processes of defining, constructing and manipulating the database for various applications
18UCS3N1/ 18UCS3N2	Non-Major Elective Paper-I Photoshop Lab/ Advanced Applications in MS Excel Lab				✓	Provides many image editing features for pixel-based images, raster graphics and vector

						graphics / Enables the users to format, organize and calculate data in a spreadsheet for data analytics
18UCS412	Core VIII: . NET Programming				✓	The language used to build console, windows and web based applications
18UCS413	Core IX: Web Technology				✓	Technologies and framework for web applications and web services
18UCS414	Core X: Data Communication and Computer Networks				✓	Allows businesses to reduce expenses and improve efficiency by sharing data and common equipment among many different computers
18UCS415	Core Lab V: . NET Programming Lab				✓	The language used to build console, windows and web based applications
18UCS416	Core Lab VI: Web Technology Lab				✓	Technologies and framework for web applications and web services
18UCS4N1/ 18UCS4N2	Non-Major Elective Paper-II Flash Lab/ Internet Services and Applications Lab				✓	Creates interactive, and animated media such as motion graphics, videos, presentations and websites / Provides access to surf the web, shop online, conduct business,

						and connect with family and friends
17UCS517	Core XI: Linux				✓	An interface between the user and the kernel to execute programs through commands
17UCS518	Core XII: Web Technology				✓	Technologies and framework for web applications and web services
17UCS519	Core XIII: Cyber Security				✓	Cyber Security can help to prevent data breaches, identity theft, and other types of cybercrime. Organizations must have strong cyber security measures to protect their data and customers.
17UCS5E1	Software Testing				✓	Identify and eliminate defects or bugs within the application that can range from minor glitches to critical errors that may lead to system crashes or incorrect data processing
17UCS5E2	Distributed Computing				✓	Distributed computing is the method of making multiple computers work together to solve a common problem
17UCS5E3	Client/Server				✓	A networking

	Technology					computing system design that illustrates a relationship between two or more computers, where the client computers request and receive services or resources from a powerful centralized server computer
17UCS520	Core Lab VII: Linux Lab				✓	An operating system provides the interface between the users of a computer and that computer's hardware & manage several services, including process scheduling, application scheduling, basic peripheral devices and file systems.
17UCS521	Core Lab VIII: Web Technology Lab				✓	Technologies and framework for web applications and web services
17UCS5S1	Word Press				✓	A Website-building tool that can cater to many different purposes, including creating online stores, portfolios, and membership sites.
17UCS5S2	Dream Weaver				✓	Dreamweaver is a software program that enables users

						to design websites without knowledge of HTML or other programming languages.
17UCS5S3	Quantitative Aptitude Skills				✓	Quantitative Aptitude assesses the candidate's problem-solving skills by making them utilise their rational thinking and quick decision-making ability to solve complex and time-constrained problems
17UCS622	Core XIV: Python Programming				✓	Python is the second-highest paid computer language, according to Indeed. Ease of Comprehension. One of the top benefits of Python is that it is easy to learn and fun to use.
17UCS6E4	Data mining and Warehousing				✓	Data mining attempts to depict meaningful patterns through a dependency on the data that is compiled in the data warehouse.
17UCS6E5	Enterprise Resource Planning				✓	A software system that helps to run the entire business, supporting

						automation and processes in finance, human resources, manufacturing, supply chain, services, procurement, and more
17UCS6E6	Grid and Cloud Computing				✓	Cloud infrastructure involves the hardware and software components required for proper implementation of a cloud computing model.
17UCS6E7	Multimedia Packages				✓	Multimedia is the use of a computer to present and combine text, graphics, audio, and video with links and tools that let the user navigate, interact, and create; and multimedia is used to represent information in an interesting and interactive manner
17UCS6E8	Big data Analytics				✓	Companies use big data in their systems to improve operations, provide better customer service, create personalized

						marketing campaigns and take other actions that, ultimately, can increase revenue and profits
17UCS6E9	Android Programming				✓	Learn the fundamentals of developing Android Applications, from project creation to installation on a physical device.
17UCS623	Core Lab IX: Python Programming Lab				✓	Python is the second-highest paid computer language, according to Indeed. Ease of Comprehension. One of the top benefits of Python is that it is easy to learn and fun to use.
17UCS624	Core Lab X: Advanced Applications in MS Excel Lab				✓	MS Excel is used to create, edit, sort, analyze, and summarize data and also to perform arithmetic and statistical calculations so that it can help solve logic and math problems

						independently of the CMS that allows to build powerful online applications
17UCS6S5	Macromedia Director				✓	A great rapid prototyping tool used to design the Halo 2 interface) as well as a great development tool (used, for example to create Food Force)
17UCS6S6	Soft Skills				✓	Used to create applications, 2D and 3D video games, self-running kiosks, and CDs and DVD launchers and supports many different images, audio, and video formats.

List of Courses having focus on local, national, regional and global developmental needs offered by BCA

UG DEPARTMENT OF COMPUTER PPLICATIONS						
Programme: BCA						Year: 2019
Course Code	Course Title	Need				Rationale
		Local	National	Regional	Global	
19UBC101	Core - I : Programming In C				✓	It is used in Embedded systems for developing desktop applications.
19UBC102	Core – II : Fundamentals of Digital Computer	✓	✓			To meet the requirements to appear for NET& SET.
19UBC1A1	Allied - I :Mathematics I - Computer Oriented Numerical And Statistical Methods	✓		✓		Gain an experience in the implementation of numerical methods using a computer.
19UBC103	Core Lab -I : Programming In C				✓	It constitutes easier time solving problems.
19UBC204	Core - III : Object Oriented Programming With C++				✓	Powerful General Purpose Programming Language used to develop OS, Browsers, games and so on.
19UBC205	Core - IV : Data Structures			✓	✓	Key Component of Computer Science, back functionality in Internet Browser, largely used in Artificial Intelligence
19UBC2A2	Allied - II : Mathematics II –Mathematical Foundations Of Computer Applications	✓	✓			Tool for improving reasoning and problem-solving capabilities
19UBC206	Core Lab - II : Programming In C++				✓	Helps to create computer applications that can be used to solve real world problems

19EVS201	Environmental Studies				✓	To acquire the knowledge of environmental issues and enrich them to take responsible decisions
18UBC307	Core - V :Relational Database Management System And Oracle				✓	It is possible to store complex business models in a relational database.
18UBC308	Core - VI : Shell Programming in Operating Systems				✓	It allows communicating with the computer without knowing how to speak the computer's language.
18UBC309	Core - VII :Data Structures and Algorithms	✓	✓	✓		It helps to understand the structure and logic of the programming concepts.
18UBC3A3	Allied - III :Accountancy For Decision Making		✓			To know financial transactions of a business.
18UBC310	Programming Lab - III : Relational Database Management System And Oracle				✓	Gains Practical experience for data storage in order to perform complex business applications.
18UBC311	Programming Lab - IV : OS Commands and Shell Script Programming				✓	Provides Problem-Oriented Learning.
18UBC312	Core Lab - V : DTP Programming	✓				It is used to create documents like leaflets, brochures and newsletters.
18UBC3N1	Non Major Elective - I : Web Designing Lab				✓	1) Can learn in a short period of time. 2) Need limited skills. 3) Freelancing projects can be done.
18UBC3N2	Non Major Elective - I : DTP Programming	✓				It is used to create documents like leaflets, brochures and newsletters.

18UBC413	Core - VIII :Framework Technologies				✓	Web technology concepts are required for developing web applications
18UBC414	Core - IX :Introduction to Web Designing and programming				✓	1) Can learn in a short period of time. 2) Need limited skills. 3) Freelancing projects can be done.
18UBC415	Core - X :Software Engineering		✓	✓		To gain the knowledge to solve the software and system challenges with a comprehensive set of skills
18UBC4A4	Allied - IV :Mathematics III - Computer Based Optimization Techniques			✓		By doing quantitative methods and techniques for effective decision making, model formulation and applications, it helps the students to equip them to solve business/job decision problems.
18UBC416	Programming Lab - VI: Web Development				✓	Reliable, fast, easy and open source framework to develop dynamic, rich web sites and web applications
18UBC417	Programming Lab - VIII: Web Designing				✓	Designing a web site is most essential in every sector which reflects in better business and revenue
18UBC418	Programming Lab - VII : PHP Programming				✓	Extensively used for building web applications, web sides, cloud computing and machine learning also.
18UBC4N3	Non Major Elective - II : Open Source Software Lab	✓				To understand the expectations of industry and to improve employability skills
18UBC4N4	Non Major Elective – II: 2-D Animation Lab	✓				Every promotion in industry is closely related to animation. Due to its extensive and ever expanding field, animators are highly demanded persons

17UBC519	Framework Technologies				✓	Web technology concepts are required for developing web applications
17UBC520	Software Testing		✓			It provides the opportunity and knowledge for a client to develop and strengthen the necessary skills to advance in a chosen area
17UBC521	Elective - I Networks				✓	Interconnects the people and companies across the world.
17UBC522	Elective –II: Organizational Behaviour	✓	✓	✓		It helps to understand one's own behaviors, attitudes, ethical views, and performance.
17UBC523	Programming Lab - IX: Framework Technologies				✓	Web technology concepts are required for developing web applications
17UBC524	Programming Lab - X : Software Testing				✓	To identify any errors, gaps or missing requirement versus the actual requirement.
ADD-ON COURSE	Mini Project	✓				Project allows the students to study, do research and act by themselves using their abilities, interests, personal experience and aptitudes.
17UBC5S1	Skill Based Elective – I Software Analysis and Design	✓	✓	✓	✓	To gain the knowledge to solve the software and system challenges with a comprehensive set of skills
17UBC5S2	Skill Based Elective – I E-Commerce	✓	✓	✓	✓	To know about commercial terms, organizations and websites
17UBC5S3	Skill Based Elective – I Aptitude	✓	✓	✓	✓	It is used to train the students to get ready for their future and write competitive exams
17UBC625	Advanced Java Programming				✓	Faster growing, easily written and executed much faster than other programming language, highly demand for job
17UBC626	Data Mining And Warehousing				✓	Very popular to analyze and explore the data in many different sectors of business
17UBC627	Information Security				✓	Everything is online and information security is more important, exciting job opportunities

17UBC628	Elective-III: Current Trends and Technologies				✓	To determine what is currently accepted to be the best and to take a constructivist approach to develop a leadership vision for implications of past, current and future developments in Technology
17UBC629	Programming Lab - XI : Advanced Java Programming				✓	Faster growing, easily written and executed much faster than other programming language
17UBC630	Programming Lab - XII : Graphics and Multimedia				✓	Hiring more graphics developers by the enterprises are increased day by day
17UBC6S4	Skill Based Elective - II: Software Industry Domains		✓			Essential to learn about the operations of the Corporate industry and prepare themselves to meet their requirement.
17UBC6S5	Skill Based Elective - II: Multimedia And Animation	✓				Every promotion in industry is closely related to animation. Due to its extensive and ever expanding field, animators are highly demanded persons
17UBC6S6	Skill Based Elective - II: Soft Skills				✓	Mandatory for everyone to sustain and survive in the field

Dr. K.HARIDAS,M.C.A.,M.Phil.,Ph.D.,
Associate Professor & Head
Department of Computer Applications,
NGM College (Autonomous), Pollachi - 642 001.

List of Courses having focus on local, national, regionaland global developmental needs offered by the M.Sc Computer Science

PG COMPUTER SCIENCE						
Programme: M.Sc Computer Science						Year: 2019
Course Code	Course Title	Need				Rationale
		Local	National	Regional	Global	
18PCS312	J2EE Technologies				✓	J2EE architecture, Servlets and JSP, EJB, JMS, JNDI, Web services, Database access, Security.
18PCS313	Digital Image Processing			✓		The students can understand the features of Java and the Web services.
18PCS314	Internet of Things			✓		To make the students understand the fundamentals of Internet of Things, IoT Protocols, built a small low cost embedded system using Raspberry Pi and to apply the concept of Internet of Things in the real world scenario.
18PCS3E1	Elective-III: Enterprise Resource planning			✓		To provide a contemporary and forward-looking on the theory and practice of Enterprise Resource Planning

						Technology.
18PCS315	Programming Lab-V : J2EE Technologies				✓	J2EE architecture, Servlets and JSP, EJB, JMS, JNDI, Web services, Database access, Security.
18PCS316	Programming Lab-VI: Digital Image Processing using MATLAB			✓		The course will provide the students about Image Processing, image compression and segmentation using MATLAB
18PCS417	Industrial Project Work and Viva voce(Individual)				✓	Providing a direct personal contact with the student during which his attitude and personality can be assessed
19PCS101	AndroidProgramming				✓	The course provide the students knowledge on the Mobile Environment and acquired mobile application development skills with Android
19PCS102	Analysis&Designof Algorithms				✓	To analyze the asymptotic performance of algorithms. Write rigorous correctness proofs for algorithms. Demonstrate a familiarity with major algorithms and data structures

19PCS103	Advanced Networks	✓				To uncover and understand the current directions of computer networks from literature readings. To expose students to the “full span” of the computer network's frontier {a breath goal}.
19PCS104	DataMiningand Warehousing				✓	To prepare the students familiar with mathematical foundations of data mining tools.Understand and implement classical models and algorithms in data warehouses and data mining.
19PCS105	ProgrammingLab-I: Android Programming				✓	The students can have a good understanding on the Mobile Environment and acquired mobile application development skills with Android
19PCS106	ProgrammingLab–II: Analysis & Design of Algorithms				✓	To make the students analyze the asymptotic performance of algorithms. Write rigorous correctness proofs for algorithms.

						Demonstrate a familiarity with major algorithms and data structures
19PCS207	Data Analytics using Python Programming				✓	The objective of business data analytics is to explore and investigate business problems or opportunities through a course of scientific inquiry.
19PCS208	InformationSecurityand Cryptography			✓		The students will be able to develop basic understanding of security, cryptography, system attacks and defences against them.
19PCS209	BigDataAnalytics				✓	Big data analytics helps companies and governments make sense of data and make better decisions. Here are some objectives of a big data analytics course
19PCS210	ProgrammingLab -III: Data Analytics				✓	The objective of business data analytics is to explore and investigate business problems or opportunities through a course of scientific inquiry.

19PCS211	ProgrammingLab-IV: Scala Programming			✓		Scala is used in building modular, scalable, and fast software. It is most commonly used by data engineers along with Apache Spark to process large amounts of data smoothly and efficiently.
19PCS212	ProgrammingLab-V : UnifiedModelingLanguage andR Tool	✓				The goal of UML is to provide a standard notation that can be used by all object-oriented methods and to select and integrate the best elements of precursor notations.
19PCS2E2	Elective–I Soft Computing	✓				The students can understand the concepts of Neural Networks, architecture, functions and various algorithms involved and also know the fundaments of fuzzy logic, various fuzzy systems and their functions.
19PCS2N1/ 19PCS2N2	Non Major Elective: MultimediaPackagesLab /WebDesigningLab				✓	Students learn how to critically evaluate website quality, learn how to create

						and maintain quality web pages, learn about web design standards and why they're important, and learn to create and manipulate images.
