FACULTY FEEDBACK:

Feedback is collected from faculty and their comments are summarized below. They strongly agreed with the curriculum design, development, student centered teaching and ICT learning resources. They agreed with the evaluation process.

They strongly agreed that they are motivated to carry out research, publication of papers, attending workshop/seminar and applying for project, but they are strongly disagreed to the facilities available for research. No facilities and chemicals are available to carry out research in the college. Funds from institution for doing research will be useful to publish the papers in SCOPUS & WoS journals. Intra departmental collaboration and subscription of reputed online journals like ACS, RSC, ELSEVIER and SCIENCE DIRECT is needed. Instruments like IR, UV-Visible, ^1H NMR, ^{13}C NMR, SEM, TEM, NOSEY, COSEY, DEPT, GC-MS, XRD etc are needed for research. If the instruments facilities are available it is possible to do research and consultancy.

Regarding Infrastructure they agreed to have adequate classroom, furniture, restrooms, laboratory and staffroom but proper maintenance of restroom and water points are suggested. In governance more renewable resources like wind energy, solar energy can be utilized. Staff members are disagreed with the fee concession. Staff members suggested revising the pay scale.
